Intercultural Challenges for the Reintegration of Displaced Professionals Tony Johnstone Young, Sara Ganassin, Stefanie Schneider, Alina Schartner, Steve Walsh, 2022-01-31 This book critically reflects on the challenges faced by refugee aspirant professionals in securing employment and the ways in which professional intercultural competence development and attendant language learning practices can help facilitate the professional reintegration in these communities. The volume draws on data from a large scale research project that saw refugee aspirant professionals, researchers and volunteer language teachers working together to develop and operationalise key intercultural skills needed for professional employment in the UK, the Netherlands and Austria, ultimately culminating in a toolkit of free online resources co-designed to meet the needs of communities and facilitate the development of these practices across Europe. Detailed analyses of the data drawn from the project allow for critical reflections on co-production in intercultural spaces and researchers' positionality, power relations and ethical choices in multilingual contexts. Taken together, the book offers both theoretical and practical considerations for application beyond the European context toward better facilitating the professional reintegration of migrant communities on a more global scale. The book will be of particular interest to students and researchers in intercultural communication, refugee studies and language education.

Critical Sociolinguistic Research Methods Monica Heller, Sari Pietikäinen, Joan Pujolar, 2024-05-27 *Critical Sociolinguistic Research Methods* is a guide to conducting concrete ethnographic and discourse analytic research projects written by top scholars for students and researchers in social science fields. Adopting a critical perspective focusing on the role of language in the construction of social difference and social inequality, the authors walk the reader through five key moments in the life of a research project: composing research questions, designing the project, doing fieldwork, performing data analysis and writing academic texts or otherwise engaging in conversation with different types of social actors about the project. These moments are illustrated by colour-coded examples from the authors' experiences that help researchers and students follow the sequential stages of a project. Now in its second edition, this popular and original text has been revised and updated to reflect the latest developments in this field, including expanded sections on the centrality of the ethnographic gaze for the understanding of social processes and on experiences of diversification in the communication of research results. Through the adoption of multimodal genres, authors share recent experiences of research presentations addressed to non-academic audiences such as installations and photography and interactive maps. Clear and highly applicable with a detailed workbook full of practical tips and examples, this book is a great resource for graduate-level qualitative methods courses in linguistics and anthropology as well as methods courses in the humanities and social sciences that focus on the role of language in research. It is a timely text for investigating language issues that matter and have consequences for people's lives.
