Resourcesensitivity Binding And Anaphora:

Resource-Sensitivity, Binding and Anaphora Geert-Jan M. Kruijff, Richard T. Oehrle, 2003-11-30 Geert Jan Kruijff Richard T Oehrle A categorial grammar is both a grammar and a type inference system As a result of this duality the categorial framework offers a natural setting in which to study questions of grammatical composition both empirically and abstractly There are affinities in this perspective of course to basic questions in formal language theory But the fact that categorial grammars are type inference systems makes possible intrinsic connections among syntactic types syntactic type inference semantic types and semantic type inference a connection less apparent in the standard constructions of formal language theory Fixing a system of grammatical type inference T we may explore what grammatical phenomena are compatible with T and equally what grammatical phenomena are not Equally fixing a class of grammatical phenomena g we may seek to ascertain what systems of type inference characterize g This dual perspective is a strong current in the categorial literature going back to the classical papers of Ajdukiewicz Bar Hillel Curry and Lambek Syntax - Theory and Analysis. Volume 2 Tibor Kiss, Artemis Alexiadou, 2015-02-24 This Handbook represents the development of research and the current level of knowledge in the fields of syntactic theory and syntax analysis Syntax can look back to a long tradition Especially in the last 50 years however the interaction between syntactic theory and syntactic analysis has led to a rapid increase in analyses and theoretical suggestions This second edition of the Handbook on Syntax adopts a unifying perspective and therefore does not place the division of syntactic theory into several schools to the fore but the increase in knowledge resulting from the fruitful argumentations between syntactic analysis and syntactic theory It uses selected phenomena of individual languages and their cross linguistic realizations to explain what syntactic analyses can do and at the same time to show in what respects syntactic theories differ from each other It investigates how syntax is related to neighbouring disciplines and investigate the role of the interfaces especially the relationship between syntax and phonology morphology compositional semantics pragmatics and the lexicon The phenomena chosen bring together renowned experts in syntax and represent the consensus reached as to what has to be considered as an important as well as illustrative syntactic phenomenon The phenomena discussed do not only serve to show syntactic analyses but also to compare theoretical approaches with each other **The Derivation of Anaphoric Relations** Glyn Hicks, 2009-03-11 The Derivation of Anaphoric Relations resolves a conspicuous problem for Minimalist theory the apparently representational nature of the binding conditions Hicks adduces a broad variety of evidence against the binding conditions applying at LF and builds upon the insights of recent proposals by Hornstein Kayne and Reuland by reducing them to the core narrow syntactic operations specifically Agree and Merge Several novel and independently motivated claims about syntactic features and phases are made not only explaining the previously stipulated roles played by command reference and locality but furnishing the derivational binding theory with sufficient flexibility to capture some long problematic empirical phenomena These include connectivity effects picture noun reflexives in English and anaphor pronoun

non complementarity Specific proposals are also made for extending the derivational approach to accommodate structured crosslinguistic variation in binding with thorough expositions and analyses of the Dutch Norwegian and Icelandic pronominal systems
