**Saracens and the Making of English Identity** Siobhain Bly Calkin, 2013-11-05 This book explores the ways in which discourses of religious racial and national identity blur and engage each other in the medieval West Specifically the book studies depictions of Muslims in England during the 1330s and argues that these depictions although historically inaccurate served to enhance and advance assertions of English national identity at this time The book examines Saracen characters in a manuscript renowned for the variety of its texts and discusses hagiographic legends elaborations of chronicle entries and popular romances about Charlemagne Arthur and various English knights In these texts Saracens engage issues such as the demarcation of communal borders the place of gender norms and religion in communities self definitions and the roles of violence and history in assertions of group identity Texts involving Saracens thus serve both to assert an English identity and to explore the challenges involved in making such an assertion in the early fourteenth century when the English language was regaining its cultural prestige when the English people were increasingly at odds with their French cousins and when English Welsh and Scottish sovereignty were pressing matters

Düzgün, 2018-07-27 The writing of a literary text is as a retrospective explanation of what is happening in the present including social cultural religious and political events and is a deliberate re-creation in actual practice The impact of immediate contemporary concerns places a literary text at least partly outside the author's control The author responds to a given context of historical and cultural incident that limits his freedom to invent adapt or explain Of these contemporary concerns the literary text is concerned first with how cultural practices and cultural changes helped to create it and second with what happens when specific historical events appear to model themselves on narrative structures and how those events can be given a conscious boost by narrative authors or patrons to make the parallels even closer History turns into literary narrative or literary narrative turns into history therefore literature and history live in each other's pockets The medieval texts that straddle the borderland between literature and history what has been called a medieval fashion for pseudo history have been repeatedly commented on over the years However the broader implications of this phenomenon for the modern understanding of medieval concepts of the past and historiography have been under-explored This volume engages with the history and the literary narrative in Medieval England through a variety of approaches to an interdisciplinary array of texts

ranging from Latin Old French Anglo Norman to Middle English between the eleventh and fifteenth centuries
