Shape: A New Contract Between Architecture and Nature Susannah Hagan, 2007-08-22 Taking Shape explores the evolution of scientific and academic theories that have resulted in the concept of sustainability Susannah Hagan uses this as a basis to argue for developments in the future and argues that these theories are not just an intellectual and aesthetic regression as they are often perceived to be By focusing on the impact of the new theories of sustainable technology and new materials in architecture Hagan moves the discourse and practice of environmental sustainability within architecture towards a greater degree of awareness of both its cultural significance and cultural potential In short it demonstrates the capacity of sustainable architecture to embrace cultural and technical innovation Santiago Calatrava Cheryl Kent, 2005
