Technology in Southeast Asian History Suzanne Moon, 2023-07-25 Explores the role of technology in the larger political and economic fabric of Southeast Asia In *Technology in Southeast Asian History* Suzanne Moon explores the profound entanglement of technology with Southeast Asian politics social life economics and culture over its long history Moon offers a unique framework for understanding the place of technology in this region and its pivotal role in the emergence of the modern technological world Synthesizing scholarship from the fields of history archaeology and anthropology Moon examines and links technological stories from prehistory to the mid twentieth century She uses analytics in the history of technology such as circulation coproduction and assemblage to highlight the processes and evolving patterns of technological dynamism that characterize the region Drawing on research focused on specific technologies including temple construction rice agriculture weaving and shipbuilding Moon investigates the interconnectedness of these technologies within the larger political and economic fabric of Southeast Asian history In contrast with portrayals of Southeast Asia as technologically deficient Moon demonstrates the richness of this region s technological cultures She rejects polarizing binaries such as traditional and modern or indigenous and foreign instead underscoring Southeast Asia s role as a dynamic cocreator of the modern technological world Technology has contributed to the creation and disruption of social and political orders shaped engagements across barriers of distance culture and language and produced and reproduced diverse cultures in this region This narrative of technological change offers students scholars and readers critical new perspectives on both technological history and Southeast Asian history *The Political Economy of Java's Northeast Coast, c. 1740-1800* Hui Kian Kwee, 2005-12-01 This book is a study of the political economy of Java s Northeast Coast from 1743 when the VOC emerged as its ruler until the end of the eighteenth century The focus is on the various power holders namely coastal Javanese regents Mataram rulers Chinese merchants and Company authorities and how they accommodated the changes brought about with the power shift what their primary resources were and how they tried to maximize their advantages in the new politico economic setting This study also shows how the Company despite being the ruler had to compromise with these power holders and satisfy their needs to optimize its own gains Maritime Trade and State Development in Early Southeast Asia Kenneth R. Hall, 2019-03-31 This book brings something new in both dimension and detail to our understanding of Southeast Asia from the first to the fourteenth centuries It puts Southeast Asia in the context of the international trade that stretched from Rome to China and draws upon a wide range of recent scholarship in history and the social sciences to redefine the role that this trade played in the evolution of the classical states of Southeast Asia By examining the sources of Southeast Asia s classical era with the tools of modern economic history the author shows that well

developed socioeconomic and political networks existed in Southeast Asia before significant foreign economic penetration took place. With the growth of interest in Southeast Asian commodities and the refocusing of the major East West commercial routes through the region during the early centuries of the Christian era, internal conditions within Southeast Asia adjusted to accommodate increased external contacts. Hall takes the view that Southeast Asia's response to international trade was a reflection of preexisting patterns of trade and statecraft. In the forty years since Coede's monumental work *The Indianized States of Southeast Asia* was published, a great deal of archaeological and epigraphical work has been done and new interpretations advanced. By integrating new theoretical constructs, recent archaeological finds and interpretations and his own informed reading and research, Kenneth R. Hall puts his historical narrative on a large canvas and treats areas not previously brought together for discussion along comparative lines. Like Coede's work, his book will be important as a basic text for the teaching of early Southeast Asian history.

Historical Dictionary of Indonesia Audrey Kahin, 2015-10-29

A wide flung archipelago lying between the Pacific and Indian Oceans, Indonesia is the world's most populous Islamic country. For over two thousand years it was a crossroads on the major trading route between China and India, but it was not brought together into a single entity until the Dutch extended their rule throughout the Netherlands East Indies in the early part of the 20th century. Declaring its independence from the Dutch in 1945, the Republic of Indonesia was ruled by only two regimes over the next half century. Throughout the years, the country has continued to be dogged by an inefficient bureaucracy and by perpetual problems of corruption. However, since 2004, Indonesia has successfully carried out four direct elections for president together with an equal number of elections for legislative bodies at all levels of government and has finally in 2014 elected a president with no ties to either the military or to the previous authoritarian power structure. This third edition of *Historical Dictionary of Indonesia* contains a chronology, an introductory essay, appendixes and an extensive bibliography. The dictionary section has over 900 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent access point for students, researchers, and anyone wanting to know more about Indonesia.

The Cambridge History of Southeast Asia: From early times to c. 1800

Nicholas Tarling, 1992

The *Cambridge History of Southeast Asia* is a multi-authored treatment of the whole of mainland and island Southeast Asia from Burma to Indonesia. Unlike other histories of the region, it is not divided on a country-by-country basis and is not structured purely chronologically, but rather takes a thematic and regional approach to Southeast Asia's history, aiming to present the current state of historical research on Southeast Asia as well as stimulating further thought and investigation.
