Automatic Ambiguity Resolution in Natural Language Processing

Alexander Franz, 1996-11-13 This is an exciting time for Artificial Intelligence and for Natural Language Processing in particular Over the last five years or so a newly revived spirit has gained prominence that promises to revitalize the whole field the spirit of empiricism This book introduces a new approach to the important NLP issue of automatic ambiguity resolution based on statistical models of text This approach is compared with previous work and proved to yield higher accuracy for natural language analysis An effective implementation strategy is also described which is directly useful for natural language analysis The book is noteworthy for demonstrating a new empirical approach to NLP it is essential reading for researchers in natural language processing or computational linguistics

The Wall Street Journal, 2007

Connectionist, Statistical and Symbolic Approaches to Learning for Natural Language Processing Stefan Wermter, Ellen Riloff, Gabriele Scheler, 1996-03-15 This book is based on the workshop on New Approaches to Learning for Natural Language Processing held in conjunction with the International Joint Conference on Artificial Intelligence IJCAI 95 in Montreal Canada in August 1995 Most of the 32 papers included in the book are revised selected workshop presentations some papers were individually solicited from members of the workshop program committee to give the book an overall completeness Also included and written with the novice reader in mind is a comprehensive introductory survey by the volume editors The volume presents the state of the art in the most promising current approaches to learning for NLP and is thus compulsory reading for researchers in the field or for anyone applying the new techniques to challenging real world NLP problems
