Seeing The Light Regaining Control Of Our Electricity System:

Bürgerenergie in Deutschland Jörg Radtke, 2016-06-17 Jörg Radtke bietet in diesem Band einen umfassenden Einblick in die gesamte Bandbreite der Organisationsstrukturen von Initiativen der Bürgerenergie und deren Beitrag zur Energiewende. Auf der Grundlage flächendeckender quantitativer Umfragedaten sowie vertiefter Analysen ausgewählter Fallbeispiele von Solar Wind und Geothermie Projekten dokumentiert er die Sozialstruktur und die Motivationen beteiligter Bürgerinnen und Bürger. Der Autor untersucht Partizipationsformen Gemeinschaftsbildung und Vernetzung der überwiegend ehrenamtlich geführten Bürgerenergie Initiativen und identifiziert individualistische Beteiligung und kollektive Handlungsweisen als neue Formen projektorientierter Partizipation an der Schnittstelle von Wirtschaft Politik und Zivilgesellschaft **Energy, Society and Environment** David Elliott, 2004-03 Uses global case studies to examine technological solutions to energy related environmental problems and suggests that social economic and political solutions may be needed to avoid serious future environmental damage **Forum for Applied Research and Public Policy**, 2001 **Wind Energy Basics** Paul Gipe, 2009-05-05 The availability of clean renewable power is without question going to be the defining challenge and goal of the 21st century and wind will lead the way. Internationally acclaimed wind energy expert Paul Gipe is as soberly critical of past energy mistakes as he is convincingly optimistic about the future. The overwhelming challenge of transforming our world from one of fossil carbon to one of clean power seems daunting at best and paralyzingly impractical at worst. Wind Energy Basics offers a solution. Wind power can realistically not only replace the lion's share of oil coal and natural gas fired electrical plants in the U.S. but also can add enough extra power capacity to allow for most of the cars in the nation to run on electricity. Gipe explains why such a startlingly straightforward solution is eminently doable and can be accomplished much sooner than previously thought and will have the capacity to resuscitate small and regional economies. Wind Energy Basics offers a how to for home based wind applications with advice on which wind turbines to choose and which to avoid. He guides wind energy installers through considerations such as renewable investment strategies and gives cautionary tales of wind applications gone wrong. And for the activist he suggests methods of prodding federal state and provincial governments to promote energy independence **Energy, Power and Protest on the Urban Grid** Andres Luque-Ayala, Jonathan Silver, 2016-04-28 Providing a global overview of experiments around the transformation of cities electricity networks and the social struggles associated with this change this book explores the centrality of electricity infrastructures in the urban configuration of social control segregation integration resource access and poverty alleviation. Through multiple accounts from a range of global cities this edited collection establishes an agenda that recognises the uneven and often historical geographies of urban electricity networks prompting attempts to rewire the infrastructure configurations of cities and predicating protest and resistance from residents and social movements alike. Through a robust theoretical engagement with established work around the politics of urban infrastructures the book frames the transformation of electricity systems in the context of power.

and resistance across urban life drawing links between environmental and social forms of sustainability Such an agenda can provide both insight and inspiration in seeking to build fairer and more sustainable urban futures that bring electricity infrastructures to the fore of academic and policy attention *Whole Earth* ,2001 **Crossed Wires** Dan Schiller,2023-02-17 In *Crossed Wires* Dan Schiller who has conducted archival research on US telecommunications for more than forty years recovers the extraordinary social history of the major network systems of the United States from the nineteenth to the twenty first centuries Drawing on arrays of archival documents and secondary sources Schiller reveals that this history has been shaped by sharp social and political conflict and is embedded in the larger history of an expansionary US political economy This authoritative and comprehensive revisionist history of telecommunications argues that business economic and regulatory concerns influenced the evolution of this industry far more than the technology *Solar Today* ,1987 *Before the Wells Run Dry* R. J. Douthwaite,2003 The world is using oil at four times the rate it is finding it and the output of many existing fields including the North Sea is beginning to decline According to one contributor to this book global oil production will start falling within the next five to ten years and increases in natural gas output will cease to be capable of making up the shortfall after about 2015 This groundbreaking book explores these and many other issues and its authors conclude that renewables do indeed have the capacity to provide the people of Europe with all the energy they need to live comfortable lives without using coal or nuclear energy at all Moreover the switch could be made within fifty years if the right decisions are taken immediately **BOOK JACKET** **Alternative Pathways in Science and Industry** David J. Hess,2007 Hess proposes a theory of scientific and technological change that considers the roles of both industry and grassroots consumers in setting the research agenda in science and technology and he identifies alternative pathways by which social movements can influence scientific and technological innovation He analyzes four of these pathways industrial opposition movements organized against targeted technologies as in the campaign against nuclear energy technology and product oriented movements which press for alternatives as does the organic food movement localism which promotes local ownership as in buy local campaigns and access pathways which support a more equitable distribution of resources Within each pathway Hess examines reforms in five areas agriculture energy waste and manufacturing infrastructure and finance Hess s theoretical argument and the empirical evidence he presents demonstrate the complex pattern of incorporation of grassroots innovations and transformation of alternative ownership structures and alternative products that has characterized the relationship of industry and activism **Energy Conservation Update** ,1981 *Books In Print* 2004-2005 Ed Bowker Staff,Staff Bowker, Ed,2004 *Choice* ,2001 **Yearly Proceedings of A.I. & S.E.E.** Association of Iron and Steel Electrical Engineers (U.S.),1931 *The Electrical Engineer* ,1885 **Gas Age** ,1890 Includes summaries of proceedings and addresses of annual meetings of various gas associations L C set includes an index to these proceedings 1884 1902 issued as a supplement to *Progressive age* Feb 15 1910 *The Nebraska Farmer* ,1914 *Electrical Engineer*

,1895 *Seeing the Light* David Morris,2001 The California energy crisis is not simply about a lack of electricity It is about who owns the production and distribution of that electricity As state after state agrees to deregulation the utility industry is approaching a concentration not seen since the Power Trust of the 1930s *Seeing the Light* urges us to change the rules now and create a future that includes affordable locally owned electricity The book chronicles hopeful new developments and reminds us that the best way to prevent another crisis is to build a better system Back cover **alternative press index**
