## **Seed Health Testing Progress Towards The 21st Century:**

Seed Health Testing John D. Hutchins, James C. Reeves, 1997 An important reference for plant pathologists and seed testing labs this volume covers the central biological commercial and policy aspects of seed health testing The first section examines significant seedborne diseases from various regions around the world This is followed by papers discussing the many policy issues facing government and commercial testing organizations The third section describes new technical developments in seed health testing particularly molecular techniques for detecting seedborne fungi and viruses and the fourth section evaluates new methods in comparative tests The volume concludes with a look at quality assurance in seed health testing labs and in the production of high quality seeds The book is based on selected papers from the second International Seed Testing Association symposium held in August 1996      **Testing Methods for Seed-transmitted**

**Viruses** Sven Erik Albrechtsen, 2006 This book provides a practical guide to the commonly used detection methods for seed transmitted viruses and viroids affecting both tropical and non tropical crops The first part describes important aspects of seed transmitted viral diseases The second and main part contains principles of the detection techniques and step by step protocols accompanied by method optimization and comments Most of the described techniques can be equally applied to plant viruses and viroids other than seedborne ones This book will be of significant interest to those working in seed testing laboratories and students and teachers within plant pathology and seed science      **Seed Health** V.
