At what Cost Nicholas Freudenberg, 2021 An incisive and powerful investigation of corporate impact on human and planetary well being Freedom of choice lies at the heart of American society Every day individuals decide what to eat which doctors to see who to connect with online and where to educate their children Yet many Americans don't realize that these choices are illusory at best By the start of the 21st century every major industrial sector in the global economy was controlled by no more than five transnational corporations and in about a third of these sectors a single company accounted for more than 40 percent of global sales The available options in food healthcare education transportation and even online presence are largely constructed by corporations whose sweeping influence have made them the public face and executive agents of 21st century capitalism At What Cost confronts how globalization financial speculation monopolies and control of science and technology have enhanced the ability of corporations and their allies to overwhelm influences of government family community and faith As corporations manipulate demand through skillful marketing and veto the choices that undermine their bottom line free consumer choice has all but disappeared and with it the personal protections guarding our collective health At What Cost argues that the world created by 21st century capitalism is simply not fit to solve our most serious public health problems from climate change to opioid addiction However author and public health expert Nicholas Freudenberg also shows that though the road is steep human and planetary well being constitute a powerful mobilizing idea for a new social movement one that will restore the power of individual voice to our democracy With impeccably detailed research and an eye towards a better future At What Cost arms ordinary citizens activists and health professionals with an understanding of how we've arrived at the precipice and what we can do to ensure a healthier collective future *A World Made for Money* Bret Wallach, 2015-05 A spirited and incisive survey of economic geography *A World Made for Money* begins with the author stopped at a red light in Norman Oklahoma Observing the landscape of drugstores and banks and for that matter the stoplight and roads themselves Bret Wallach observes Everything I see has been built to make money or at the very least to facilitate making money This he argues is a global phenomenon that nonetheless has occurred only within the past hundred years or so Although guidebooks and culture brokers often disparage these landscapes of commerce Wallach recipient of a MacArthur genius grant argues that we would do well to pay them close attention *A World Made for Money* provides a compelling condensed tour of our world From Silicon Valley to Sri Lanka from post Soviet Russia to post apartheid South Africa Wallach looks at how human beings are buying manufacturing working growing and shipping food and accessing the natural resources to fuel it all These essential facets of daily life propelled by the profit motive represent a transnational force shaping our surroundings and environment in ways that may not always be beautiful or even healthy but that are fundamental to understanding how the world works in the twenty first century Wallach examines the relationship between acquisitiveness and landscape reveals surprising contradictions and nuances and provides fresh perspective on politically

charged topics such as sprawl deindustrialization and agribusiness
