Photography as Social

Transformation Maciej Frąckowiak, 2025-06-03 Photography as Social Transformation resituates the practices of photography within contemporary sociological thinking. It examines how photography influences and shapes social order in the social media age and offers a methodological framework for studying transformation, revealing the forms the process can take and the settings in which it occurs. Photography and the transformation it effects is conceptualised using actor network theory, allowing it to be effectively studied in the context of globalisation and the rapid spread of mobile devices. Going beyond consideration of the images themselves, Maciej Frąckowiak analyses the rituals and devices used to take them, the networks in which they circulate, conversations about them, and institutional attempts to regulate their content. More than dead paper or a digital file or a visual representation, Photography as Social Transformation shows how photography is a complex social phenomenon, causal and capable of producing change. Offering case studies from around the world and drawing on a range of sources, giving priority to media coverage from specialised and popular venues, Photography as Social Transformation is for students and scholars of the sociology of media, visual sociology, photographic methods in research, media and communications, cultural studies, and photography theory.

Artificial Intelligence in Architecture Matias del Campo, 2024-05-13 Artificial intelligence (AI) applications in architectural design have achieved a critical mass and exploded into the mainstream of architectural imaginations. From practical applications in design and construction to the implications for architectural theory to a plethora of novel tools for accelerated morphological studies, what has become clear is that the discipline is passing a threshold that fundamentally changes architecture as a whole. However, the most radical change is the interrogation and novel discussion of authorship and agency in design ecologies driven by synthetic imaginations. What does it mean for authorship when more than 50 per cent of the content is generated by a nonhuman player? This issue seems more pressing than ever. In a world that is being transformed by AI on a daily basis, what is the role of the sole genius and designers, artists, and architects? This AD dives deep into current discussions about the human position in architectural design, which is increasingly entangled in an AI-driven design context. Contributors: Cesare Battelli, Phil Bernstein, Mario Carpo, Benjamin Ennemoser, and Ingrid Mayrhofer, Hufnagl, Sarah Fox, Wanyu He, Andrew Kudless, Ryan Vincent Manning, Sandra Manning, Kyle Steinfeld, Andrew Witt, and Michael Young.

Urban and Transit Planning Paola Gallo, Simon Elias Bibri, Francesco Alberti, Abraham R. Matamanda, Cristina Piselli, Hamid Rabiei, Rosa Romano, Ayse Ozcan- Buckley, 2025-05-01 This book covers a critical topic including green building design, sustainable urban mobility, renewable energy integration, and the use of advanced technologies to minimize environmental impact.
