

How to Make COMPOST

1

Choose a place

Ideal compost area is a dry, shady spot near a water source, with dimensions of 3 x 3 x 3 feet.

2

Add the ingredients

The ingredients are those rich in carbon (brown materials) and those rich in nitrogen (green materials). Make sure large materials are chopped or shredded.

3

Add water as needed

Make sure the pile stays moist, but not too wet (it should feel like a damp sponge).

4

Keep things moving

Turn your compost mixture to add air to the mix. This helps speed up the composting process.

5

Wait a while

When the compost no longer gives off heat and becomes dry, brown and crumbly, it's fully cooked and ready to be fed to the garden.
