HBR's 10 Must Reads Big Business Ideas Collection (2015-2017 plus The Essentials) (4 Books) (HBR's 10 Must Reads)
Harvard Business Review, 2016-10-11 Once a year Harvard Business Review's editors examine the ideas, insights, and best practices from the past twelve months to select the most definitive articles we've published: those that have provoked the most conversation, the most inspiration, the most change. Now these highly curated collections of articles are available all in one place. Whether you're catching up or trying to stay ahead, these volumes present the latest, most significant thinking driving business today. Yet certain challenges never go away. That's why this set also contains HBR's 10 Must Reads: The Essentials, which collects the 10 seminal articles by management's most influential experts on topics of perennial concern to ambitious managers and leaders hungry for inspiration and ready to run with big ideas to accelerate their own and their companies' success. HBR's 10 Must Reads series is the definitive collection of ideas and best practices for aspiring and experienced leaders alike. These books offer essential reading selected from the pages of Harvard Business Review on topics critical to the success of every manager. Each book is packed with advice and inspiration from leading experts such as Clayton Christensen, Peter Drucker, Rosabeth Moss Kanter, John Kotter, Michael Porter, Daniel Goleman, Theodore Levitt, and Rita Gunther McGrath.

Overcrowded Roberto Verganti, 2017-01-27 A more powerful innovation which seeks to discover not how things work but why we need things. The standard text on innovation advises would-be innovators to conduct creative brainstorming sessions and seek input from outsiders, users, or communities. This kind of innovating can be effective at improving products but not at capturing bigger opportunities in the marketplace. In this book, Roberto Verganti offers a new approach: one that does not set out to solve existing problems but to find breakthrough, meaningful experiences. There is no brainstorming which produces too many ideas unfiltered but a vision, subject to criticism. It does not come from outsiders but from one person's unique interpretation. The alternate path to innovation mapped by Verganti aims to discover not how things work but why we need things. It gives customers something more meaningful, something they can love. Verganti describes the work of companies including Nest Labs, Apple, Yankee Candle, and Philips Healthcare that have created successful businesses by doing just this. Nest Labs, for example, didn't create a more advanced programmable thermostat because people don't love to program their home appliances. Nest's thermostat learns the habits of the household and bases its temperature settings accordingly. Verganti discusses principles and practices, methods and implementation. The process begins with a vision and proceeds through developmental criticism: first from a sparring partner and then from a circle of radical thinkers, then from external experts and interpreters, and only then from users. Innovation driven by meaning is the way to create value in our current world where ideas are abundant but novel visions are rare. If something is meaningful for both the people who create it and the people who consume it, business value follows.
