Sustainable Construction Materials and Technologies Yoon-Moon Chun, Peter Claisse, Tarun R. Naik, Eshmaiel Ganjian, 2020-11-26 The construction materials industry is a major user of the world's resources. While enormous progress has been made towards sustainability, the scope and opportunities for improvements are significant. To further the effort for sustainable development, a conference on Sustainable Construction Materials and Technologies was held at Coventry University, Coventry, U.K. from June 11th-13th 2007 to highlight case studies and research on new and innovative ways of achieving sustainability of construction materials and technologies. This book presents selected important contributions made at the conference. Over 190 papers from over 45 countries were accepted for presentation at the conference, of which approximately 100 selected papers are published in this book. The rest of the papers are published in two supplementary books. Topics covered in this book include sustainable alternatives to natural sand, stone and Portland cement in concrete; sustainable use of recyclable resources such as fly ash, ground municipal waste, slag, pozzolan, rice husk ash, silica fume, gypsum, plasterboard, drywall and lime in construction; sustainable mortar, concrete, bricks, blocks and backfill; the economics and environmental impact of sustainable materials and structures; use of construction and demolition wastes and organic materials; straw bale, hemp, etc. in construction; sustainable use of soil, timber and wood products and related sustainable construction and rehabilitation technologies.

Longer Lasting Products Tim Cooper, 2016-05-06 The present economic system requires us to consume and throw away more and more goods. Yet often it's our desire and the best interests of the environment for these goods to last. The contributors to this book, who comprise many of the most significant international thinkers in the field, explore how longer lasting products could offer enhanced value while reducing environmental impacts. If we created fewer but better quality products, looked after them carefully and invested more in repair, renovation and upgrading, would this direct our economy onto a more sustainable course? The solution sounds simple yet it requires a seismic shift in how we think, whether as producers or consumers, and our voracious appetite for novelty. The complex range of issues associated with product life spans demands a multidisciplinary approach. The book covers historical context, design, engineering, marketing, law, government policy, consumer behaviour and systems of provision. It addresses the whole range of consumer durables: vehicles, kitchen appliances, audio/visual equipment and other domestic products, furniture and floor coverings, hardware, garden tools, clothing, household textiles, recreational goods and DIY goods, as well as the re-use of packaging. Longer Lasting Products provides policy makers, those involved in product design, manufacturing and marketing, and all of us as consumers, with clear and compelling guidance as to how we can move away from a throwaway culture towards an economy sustained by more durable goods.

Reuse of Disposables, 1983 *Nontimber Forest Products in the United States* Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America's forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to the United States it brings together research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of NTFPs in North America By examining all aspects

of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests
