

# What is Holographic Data Storage?

- ❖ The first papers on holographic storage were published in 1963
- ❖ Holographic storage is using the entire medium instead of a few layers.
- ❖ use 2 laser beams instead of one with one carrying the data and the other being a reference beam.

*Selected Papers on Holographic Storage* Glenn T. Sincerbox, 1994

**Materials** Hans I. Bjelkhagen, 1996 This text presents a collection of papers on holographic recording materials It covers topics such as film grain noise on wavefront reconstruction imaging production of blazed holograms reversal bleaching for low flare light on holograms and red sensitivity of dichromated gelatin films

Current Research on Optical Materials, Devices and Systems in Taiwan Sien Chi, Tien-Pei Lee, 1998 The electronics industry in Taiwan has shifted its emphasis from consumer to information based products It is enjoying the bulk of the world market in computer motherboards keyboards scanners and PC monitors Optoelectronics is a growing sub group within information based electronics In addition to the established areas other technologies such as optical storage optical signal processing optical switching and transmission are emerging Research efforts at universities and research institutions are strongly supported by the official bodies of the government The articles collected in this volume are contributed by the most active researchers in the area of optics and photonics in Taiwan The subject areas covered such as Optical Materials Devices and Systems are by no means representative of the breadth nor depth of optical research in Taiwan Instead they offer a snapshot of the ongoing work that will lead to success in the commercial world in future

**Optical Neural Networks** Cornelia Denz, 2013-11-11 In recent years there has been a rapid expansion in the field of nonlinear optics as well as in the field of neural computing Up to date no one would doubt that nonlinear optics is one of the most promising fields of realizing large neural network models due to their inherent parallelism the use of the speed of light and their ability to process two dimensional data arrays without carriers or transformation bottlenecks This is the reason why so many of the interesting applications of nonlinear optics associative memories Hopfield networks and self organized nets are realized in an all optical way using nonlinear optical processing elements Both areas attracting people from a wide variety of disciplines and judged

by the proliferation of published papers conferences international collaborations and enterprises more people than ever before are now involved in research and applications in these two fields These people all bring a different background to the area and one of the aims of this book is to provide a common ground from which new development can grow Another aim is to explain the basic concepts of neural computation as well as its nonlinear optical realizations to an interested audience Therefore the book is about the whole field of optical neural network applications covering all the major approaches and their important results Especially it is an introduction that develops the concepts and ideas from their simple basics through their formulation into powerful experimental neural net systems

#### **Selected Papers on Optical Correlators** Suganda

Jutamulia,1993 *Optical Storage and Retrieval* Francis T.S. Yu,1996-06-13 Presents recent technical information and gives an overview of progress in optical memory neural networks and fractals from the viewpoint of optical information processing The work introduces holographic optical disks and holographic storage in photorefractive crystal fibre discusses the optical implementation of neural networks explains the use of neurochips as artificial retinas and more

**Selected Papers on Computer-generated Holograms and Diffractive Optics** Sing H. Lee,1992 An important feature of computer generated holograms CGHs is to create wavefronts that may be defined only mathematically Since A W Lohmann and his colleagues invented CGHs in 1966 for spatial filtering in image processing the applications of CGHs have multiplied to include 3 D display optical testing diffractive binary optics bifocal intraocular lenses wavefront transformations for material processing pickup heads for optical disks focal plane array detection coherent laser addition beam steering and optical interconnects for parallel computing and neural computing Today the applications of CGHs continue to expand This book features a selection of papers that examine different aspects of the development of CGHs from the 1960s through 1990 because there is no substitute for reading the original papers on any subject even if that subject is mature enough to have many single aspect monographs and textbooks It is hoped that this selection of papers will be valuable additions to many working libraries on this expanding expansive subject
