American Book Publishing Record ,2006 **Energy And Mass In Relativity Theory** Lev Borisovich Okun,2009-03-04

Energy and Mass in Relativity Theory presents about 30 pedagogical papers published by the author over the last 20 years. They deal with concepts central to relativity theory: energy E , rest energy E_0 , momentum p , mass m , velocity v of particles of matter including massless photons for which $v = c$. Other related subjects are also discussed. According to Einstein's equation $E_0 = mc^2$, a massive particle at rest contains rest energy which is partly liberated in the nuclear reactions in the stars and the Sun as well as in nuclear reactors and bombs on the Earth. The mass entering Einstein's equation does not depend on velocity of a body. This concept of mass is used in the physics of elementary particles and is gradually prevailing in the modern physics textbooks. This is the first book in which Einstein's equation is explicitly compared with its popular though not correct counterpart $E = mc^2$ according to which mass increases with velocity. The book will be of interest to researchers in theoretical atomic and nuclear physics, to historians of science as well as to students and teachers interested in relativity theory.

Gerald James Holton, Stephen G. Brush, 1996-10. Quiz: la característica más sorprendente de este libro es el énfasis que pone en la naturaleza del descubrimiento, el razonamiento y la formación de conceptos como un tópico fascinante. Esto significa que los aspectos históricos y filosóficos de la exposición no son meramente un ingrediente dulce para conseguir que el lector digiera el texto lo más fácilmente posible sino que se presentan por su propio interés intrínseco.
