Research Handbook on University Rankings Hazelkorn, Ellen, Mihut, Georgiana, 2021-12-10 Gathering unique and thoughtful contributions from leading international scholars this timely Research Handbook offers diverse perspectives on university rankings twenty years after the first global rankings emerged It presents an in depth analysis that reflects the current state of research on rankings their influence and impact **The Abundant University** Michael D.

Smith, 2023-09-19 Why our current system of higher education is financially and morally unsustainable and how to address the crisis with the creative implementation of digital technologies For too long our system of higher education has been defined by scarcity scarcity in enrollment scarcity in instruction and scarcity in credentials In addition to failing students professionally this system has exacerbated social injustice and socioeconomic stratification across the globe In **The Abundant University** Michael D Smith argues that the only way to create a financially and morally sustainable higher education system is by embracing digital technologies for enrolling instructing and credentialing students the same technologies that we have seen create abundance in access to resources in industry after industry The Abundant University explains how we got our current system why it is such an expensive inefficient mess and how a system based on exclusivity cannot foster inclusivity Smith challenges the resistance to digital technologies that we have already seen among numerous institutions citing the examples of faculty resistance toward digital learning platforms While acknowledging the understandable self preservation instinct of our current system of residential education Smith makes a case for how technology can engender greater educational opportunity and create changes that will benefit students employers and society as a whole **Breaking Ranks**

Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America's colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining

what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality Recommended Promotions to the Ranks of Professor and Associate Professor University of Michigan. Office of the Provost and Vice President for Academic Affairs, 2005 *Qualifications Determining Selection and Promotion of College Teachers of Education, 1950-51* Claude Kelley, 1953 **Ranking Business Schools** Linda Wedlin, 2006-01-01 In her admirable book Wedlin entangles what business school rankings really are and why they have become so important The book contains plenty to interest the growing army of business school employees whose duties at least in part are concerned with boosting their institution's position in the rankings Education and Training In times when the management education field is increasingly impacted by a proliferation of ranking exercises this book is a timely and welcome contribution Linda Wedlin unpacks for us the real meaning of the contemporary explosion of rankings Rather than simple classification schemes and mechanisms rankings are she suggests arenas where the field of business education is being created and re created They are the loci of boundary work whereby a field is progressively evolving and constituting itself This is a convincing study relying on rich empirical data and carefully anchored in relevant theoretical debates A must read for all those academics students policy makers and education professionals who want to understand the complex contemporary logics of higher education in management but also probably well beyond Marie Laure Djelic ESSEC Business School Paris France League tables appear everywhere and have become important aspects of business school environments Based on in depth and creatively combined empirical studies Linda Wedlin provides us with explanations and insights on the emergence and impact of such rankings This book should be of great value for all those who seek to play the ranking game It gives a fresh perspective on how classification mechanisms drive the emergence boundary setting and change of organizational fields Kerstin Sahlin Andersson Uppsala University Sweden A fascinating study of the complex issues surrounding MBA rankings Business schools really hate them but at times have to pretend to love them Magazines and newspapers are really interested in their sales potential but have to make pretensions about their veracity Linda Wedlin focuses on an area rich in hypocrisy and hype but also one where there are real consequences ranking furthered re inforces the homogenising tendencies of MBAs Anthony Hopwood Sa d Business School University of Oxford UK This is a most fascinating topic dealt with in a manner which is both serious and entertaining everyone in a business school would want to read it Linda Wedlin's excellent research is presented with a no nonsense approach if there is anything worth counting she counts it and then interprets it no fuss Exemplary Barbara Czarniawska G teborg University Sweden This engaging book offers a fresh perspective on the burgeoning field of European management education and its intense concern with rankings Using a creative mix of well crafted research tools Wedlin deftly captures a professional field in transition as it both expands and develops shared standards Walter W Powell

Stanford University US International comparisons and rankings of universities and business schools have proliferated in recent years Ranking Business Schools provides a welcome analysis of this development and its implications for the field of management education theorizing the role of classifications such as rankings in forming and structuring organizational fields Focusing on the European experience with rankings and the subsequent response the book illustrates how business schools use rankings to form identities and positions and to draw boundaries for the field By both creating and confirming belonging to a business school community and providing distinction within that group rankings are important for defining an international field of management education organizations constructing an international business school market and constitute an arena for debating and establishing the boundaries of this field Building an extensive theoretical framework for understanding classification
