Smartphones as Locative Media Jordan Frith, 2015-03-26 Smartphone adoption has surpassed 50% of the population in more than 15 countries and there are now more than one million mobile applications people can download to their phones. Many of these applications take advantage of smartphones as locative media which is what allows smartphones to be located in physical space. Applications that take advantage of people's location are called location based services and they are the focus of this book. Smartphones as locative media raise important questions about how we understand the complicated relationship between the Internet and physical space. This book addresses these questions through an interdisciplinary theoretical framework and a detailed analysis of how various popular mobile applications including Google Maps, Facebook, Instagram, Yelp, and Foursquare use people's location to provide information about their surrounding space. The topics explored in this book are essential reading for anyone interested in how smartphones and location based services have begun to impact the ways we navigate and engage with the physical world.

Developing Android Applications with Adobe AIR Véronique Brossier, 2011-04-22 Put your ActionScript 3 skills to work building mobile apps. This book shows you how to develop native applications for Android based smartphones and tablets from the ground up using Adobe AIR. You learn the entire development process hands on from coding specific functions to options for getting your app published. Start by building a sample app with step by step instructions using either Flash Professional or Flash Builder. Then learn how to use ActionScript libraries for typical device features such as the camera and the accelerometer. This book includes ready to run example code and a case study that demonstrates how to bring all of the elements together into a full scale working app. Create functionality and content that works on multiple Android devices. Choose from several data storage options. Create view and navigation components including a back button. Get tips for designing user experience with touch and gestures. Build a location aware app or one that makes use of motion. Explore ways to use audio, video and photos in your application. Learn best practices for asset management and development.
