Eco-Homes Doctor Jenny Pickerill, 2016-01-15 It is widely understood that good affordable eco housing needs to be at the heart of any attempt to mitigate or adapt to climate change This is the first book to comprehensively explore eco housing from a geographical social and political perspective It starts from the premise that we already know how to build good eco houses and we already have the technology to retrofit existing housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States *Eco Homes* examines the ways in which radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us The Natural Building Companion Jacob Deva Racusin, Ace McArleton, 2012 Natural buildings not only bring satisfaction to their makers and joy to their occupants they also leave the gentlest footprint on the environment In this complete reference to natural building philosophy design and technique Jacob Deva Racusin and Ace McArleton walk builders through planning and construction The Natural Building Companion provides the tools necessary to understand basic principles of building science including structural and thermal engineering and hydrodynamics This guide offers thorough up to date and advanced installation details and performance characteristics of straw bale straw clay woodchip clay and cellulose wall systems as well as earthen and stone wall systems and a variety of framing roofing flooring mechanical system and finishing options This fully illustrated volume informs professionals making the transition from conventional building homeowners embarking on their own construction or green
