Self Sustaining Garden A Gardeners Guide To Matrix Planting:

The Self-sustaining Garden Peter Thompson,1997 Matrix gardening is based on the concept of matching plants to places When done successfully Thompson maintains plants replace activities that involve spades rakes and hoes as the controllers of what goes on in the garden Certain plants establish what he calls self governing communities He says that these plants survive and grow simply because we leave them alone He gives advice on establishing a matrix garden including natural grasslands garden pools and wetlands and mixed borders on pest and disease control on soil care on fertilizing and on tree management There are plant lists for each type of garden This informative paperback is augmented by 80 color photographs and a number of black and white drawings **The Self-sustaining Garden** Peter Thompson,2007 **The**
