Mahmud, Maryam Doborjeh, Kevin Wong, Andrew Chi Sing Leung, Zohreh Doborjeh, M. Tanveer, 2025-07-25 The eleven volume set LNCS 15286 15296 constitutes the refereed proceedings of the 31st International Conference on Neural Information Processing ICONIP 2024 held in Auckland New Zealand in December 2024 The 318 regular papers presented in the proceedings set were carefully reviewed and selected from 1301 submissions They focus on four main areas namely theory and algorithms cognitive neurosciences human centered computing and applications *Semantic Information Processing*

Marvin Lee Minsky, 1968 **What Computers Still Can't Do** Hubert L. Dreyfus, 1992-10-30 When it was first published in 1972 Hubert Dreyfus's manifesto on the inherent inability of disembodied machines to mimic higher mental functions caused an uproar in the artificial intelligence community The world has changed since then Today it is clear that good old fashioned AI based on the idea of using symbolic representations to produce general intelligence is in decline although several believers still pursue its pot of gold and the focus of the AI community has shifted to more complex models of the mind It has also become more common for AI researchers to seek out and study philosophy For this edition of his now classic book Dreyfus has added a lengthy new introduction outlining these changes and assessing the paradigms of connectionism and neural networks that have transformed the field At a time when researchers were proposing grand plans for general problem solvers and automatic translation machines Dreyfus predicted that they would fail because their conception of mental functioning was naive and he suggested that they would do well to acquaint themselves with modern philosophical approaches to human beings What Computers Can't Do was widely attacked but quietly studied Dreyfus's arguments are still provocative and focus our attention once again on what it is that makes human beings unique Advances in Multimedia
