The Mathematical Theory of Semantic

Communication Kai Niu,Ping Zhang,2025-05-31 This Open Access Book explores how classical information theory's focus on syntactic information has limited the further development of communication science. Recently, communication technologies that handle and transmit semantic information have gained widespread attention in academia. Semantic communication has paved new directions for the future of communication technology development, yet it lacks a general mathematical guiding theory. To address this challenge, this open access book constructs a theoretical framework for semantic information theory and provides a systematic exposition of the measurement system for semantic information and the theoretical limits of semantic communication. It serves as a professional reference for researchers in information and communication. The book begins by deeply analyzing the data characteristics of various information sources and the needs of downstream tasks to summarize and generalize the universal attribute of semantic information: synonymy, and to define the synonymous mapping between semantic information and syntactic information. Stemming from this core concept, synonymous mapping, this book introduces the measures of semantic information. It then introduces a new mathematical tool: Synonymous Asymptotic Equipartition AEP, to explore the mathematical properties of synonymous typical sequences and applies random coding and synonymous typical sequence decoding/encoding to prove the semantic lossless source coding theorem, semantic channel coding theorem, and semantic limited distortion source coding theorem. In addition, the semantic information measures in the continuous case are discussed, and a new channel capacity formula of the band-limited Gaussian channel is obtained, which is an important extension of the classical channel capacity. The book is a valuable resource for researchers, academics, and professionals in the field of information and communication, particularly those interested in advancing the frontiers of semantic communication technology.

Deep Learning Enabled Semantic Communications Zhijin Qin,Xiaoming Tao,Huiqiang Xie,Zhenzi Weng,2025-12-16 Comprehensive overview of the principles, theories, and techniques behind deep learning-enabled semantic communications. **Deep Learning Enabled Semantic Communications** explores the synergy between deep learning and semantic communication, particularly in the context of advancing 6G networks. It provides a focused introduction to the subject, systematically covering deep learning-enabled semantic communication systems and task-oriented semantic transmission paradigms in wireless communication. The book reviews various aspects of semantic communications, including information theory, multimodal technologies, semantic noise, and semantic sensing. It explores cutting-edge semantic communication architectures, highlighting their advantages over traditional approaches and their potential to drive the future of intelligent information industry. The book also details applications of deep learning-based semantic communication systems across various sources, including text, speech, images, and videos, comprehensively addressing system design, performance,

optimization and measurement metrics The book is divided into eight main parts which cover foundational knowledge system design multimodal and multitask oriented semantic communication systems joint semantic sensing and sampling semantic noise suppression and generative AI enabled systems Written by a diverse group of experts in academia and research institutions Deep Learning Enabled Semantic Communications includes information on Fundamental knowledge about deep learning and semantic communications including the history neural networks and semantic information theory Compression of multimodal inputs extraction of global semantic information and the design of neural networks to boost the capability of handling lengthy speech Incorporation of different sources to extract semantic features and serve diverse intelligent tasks at the receiver Introduction of semantic impairments in communications to uncover how to design robust systems Joint design of data sampling compression and coding schemes under the guidance of semantic information Framework of generative semantic communications to detail the principles of incorporating generative models into semantic communications Deep Learning Enabled Semantic Communications is an essential learning resource and reference for graduate and undergraduate students pursuing degrees in wireless communications signal processing or deep learning as well as engineers in the telecommunications and IT industries focusing on wireless communication techniques

Jaszczolt,2005-07-07 In this pioneering book Kasia Jaszczolt lays down the foundations of an original theory of meaning in discourse reveals the cognitive foundations of discourse interpretation and puts forward a new basis for the analysis of discourse processing She provides a step by step introduction to the theory and its application and explains new terms and formalisms as required Dr Jaszczolt unites the precision of truth conditional dynamic approaches with insights from neo Gricean pragmatics into the role of speaker s intentions in communication She shows that the compositionality of meaning may be understood as merger representations combining information from various sources including word meaning and sentence structure various kinds of default interpretations and conscious pragmatic inference Among the applications the author discusses are constructions that pose problems in semantic analysis such as referring expressions propositional attitude constructions presupposition modality numerals and sentential connectives She proposes solutions to cutting edge problems in the semantics pragmatics interface for example how many levels of meaning should be distinguished the status of under specification how much contextual information should be placed in the representation of the speaker s meaning whether there are default interpretations the stage of utterance interpretation at which pragmatic inference begins and whether compositionality is a necessary feature of the theory of meaning and if so how it is to be defined The book is for advanced students and researchers in semantics pragmatics computational linguistics and philosophy of language
