**Philosophy in the Age of Science and Capital** Andrew Williams, 2017-06-16 Science and capitalism are two dominant forces of contemporary society Science has effectively taken control of the material world whilst capitalism has effectively structured it Capitalism marches across the globe reducing culture to consumption whilst science slowly excludes metaphysics and creativity from all constructive dialogue And philosophy faced by such challenges has crumbled has proved itself incapable of coherent critique or alternative visions The purpose of this book is to begin the work of recasting philosophy to face these challenges Based on an original synthesis of the work of Marx and Bergson the key theorists of capitalism and creativity the book presents an analysis of contemporary science and capital **Philosophy in the Age of Science and Capital** Gregory Dale Adamson, 2002-01-01 Based on an original synthesis of the work of Marx and Bergson the key theorists of capitalism and creativity the book presents an astonishing analysis of contemporary science and capital Exploring in particular genetics evolutionary theory commodification and class consciousness Philosophy in the Age of Science and Capital injects life back into contemporary politics ethics and aesthetics **Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur** ,2004 **Comptes Rendus Philosophiques** ,2004 Philosophical Issues of Human Cyborgization and the Necessity of Prolegomena on Cyborg Ethics Greguric, Ivana, 2021-10-22 We are currently living in an age of scientific humanism Cyborgs robots avatars and bio technologically created beings are new entities that exist alongside biological human beings As with many emerging technologies many people will find the concept foreign and frightening There is a strong possibility that these entities will be mistreated Philosophical Issues of Human Cyborgization and the Necessity of Prolegomena on Cyborg Ethics discusses the ethics of human cyborgization as well as emerging technologies of robots and avatars that exhibit human like qualities The chapters build a strong case for the necessity of cyborg ethics and protocols for preserving the vitality of life within an ever advancing technological society Covering topics such as cyborg hacking historical reality and naturalism this book is a dynamic resource for scientists ethicists cyber behavior professionals students and professors of both technological and philosophical studies faculty of higher education philosophers AI engineers healthcare professionals researchers and academicians Universities and Science in the Early Modern Period Mordechai Feingold, Victor Navarro-Brotons, 2006-10-03 This book includes most of the contributions presented at a conference on Universities and Science in the Early Modern Period held in 1999 in Valencia Spain The conference was part of the Five Centuries of the Life of the University of Valencia Cinc Segles celebrations and from the outset we had the generous support of the Patronato Foundation overseeing the events In recent decades as a result of a renewed attention to the institutional political social and cultural context of scientific activity we have witnessed a reappraisal of the role of the universities in the construction and development of early modern science In essence the following conclusions have been reached 1 the attitudes regarding scientific progress or novelty differed from country to country and

follow different trajectories in the course of the early modern period 2 institutions of higher learning were the main centers of education for most scientists 3 although the universities were sometimes slow to assimilate new scientific knowledge when they did so it helped not only to remove the suspicion that the new science was intellectually subversive but also to make science a respectable and even prestigious activity 4 the universities gave the scientific movement considerable material support in the form of research facilities such as anatomical theaters botanical gardens and expensive instruments 5 the universities provided professional employment and a means of support to many scientists and 6 although the relations among the universities and the academies or scientific societies were sometimes antagonistic the two types of institutions often worked together in harmony performing complementary rather than competing functions moreover individuals moved from one institution to another as did knowledge methods and scientific practices

THE EDUCATIONAL TIMES, AND JOURNAL OF THE COLLEGE OF PRECEPTORS C.F. HODGSON, 1871 *Philosophy in a New Key* Susanne K. Langer, 2009-07-01 Modern theories of meaning usually culminate in a critique of science This book presents a study of human intelligence beginning with a semantic theory and leading into a critique of music By implication it sets up a theory of all the arts the transference of its basic concepts to other arts than music is not developed but it is sketched mainly in the chapter on artistic import Thoughtful readers of the original edition discovered these far reaching ideas quickly enough as the career of the book shows it is as applicable to literature art and music as to the field of philosophy itself The topics it deals with are many language sacrament myth music abstraction fact knowledge to name only the main ones But through them all goes the principal theme symbolic transformation as the essential activity of human minds This central idea emphasizing as it does the notion of symbolism brings Mrs Langer's book into line with the prevailing interest in semantics All profound issues of our age seem to center around the basic concepts of symbolism and meaning The formative creative articulating power of symbols is the tonic chord which thinkers of all schools and many diverse fields are unmistakably striking the surprising far reaching implications of this new fundamental conception constitute what Mrs Langer has called philosophy in a new key Mrs Langer's book brings the discussion of symbolism into a wider general use than criticism of word meaning Her volume is vigorous effective and well written and will appeal to everyone interested in the contemporary problems of philosophy
