The Philosophy of Primary Education R. F. Dearden, 2011 This volume provides a rigorous examination of theoretical concepts such as need interest growth play experience activity and self expression It also makes an important contribution towards getting a closely argued educational theory In the first part of the book the author establishes general aims and ends with suggestions as to what the curriculum ought to be The second part is concerned with the procedures of learning and teaching appropriate to such a curriculum **The Philosophy of Primary Education (RLE Edu K)** R Dearden, 2012-05-04

This volume provides a rigorous examination of theoretical concepts such as need interest growth play experience activity and self expression It also makes an important contribution towards getting a closely argued educational theory In the first part of the book the author establishes general aims and ends with suggestions as to what the curriculum ought to be The second part is concerned with the procedures of learning and teaching appropriate to such a curriculum *The Philosophy of Primary Education* Robert Frederick Dearden, 1969 *The Philosophy of Education: An Introduction* Richard

Bailey, 2014-10-28 The Philosophy of Education An Introduction encourages the reader to actively engage with the philosophy of education and the carefully selected contributors bring the philosophy of education to life for the reader Each chapter focuses on a particular area of debate and explains the main concepts includes extracts from philosophical writing followed by questions that guide the reader to critically and actively engage with the text guides the reader towards further reading and suggests next steps and more challenging sources or counter pointed arguments The Philosophy of Education An Introduction is essential reading for education students and for trainee teachers on undergraduate and postgraduate programmes It will also appeal to practicing teachers and educationalists who wish to engage with philosophical approaches to contemporary educational issues **An Introduction to African Legal Philosophy** John Murungi, 2013-04-11

A book on legal philosophy necessarily focuses attention on law In addition to this focus An Introduction to an African Legal Philosophy focuses attention on philosophy The link between law and philosophy is brought into relief which is done through an African context An attempt is made to spell out what is African about legal philosophy without being cut off of African legal philosophy from non African legal philosophy The book draws attention to the view that a basic component of African legal philosophy consists of an investigation of what it is to be an African and because an African is a human being among other human beings the investigation is about what it is to be a human being Ubuntuism is an African derived word that captures this mode of being human Moreover because human beings are cultural beings African cultural context guides the investigation Inescapably it is claimed that every legal philosophy is embedded in a culture African legal philosophy is not an exception It is deeply rooted in African culture a culture that is today shaped in part by a European colonialist culture One feature that will strike one as one reads the book is that the book approaches African legal philosophy as a means of decolonization of African culture African legal philosophy can accomplish this intelligently and effectively if it is itself

decolonized In doing this it contrasts sharply with mainstream Western legal philosophy *Primary Education* ,1895

Philosophy of Environmental Education Michael Bonnett,Justin Dillon,Alan Reid,2025-09-26 This volume identifies and debates important elements of what would be involved in an education that is truly adequate for the environmental situation that currently confronts us The chapters in the book present a wide variety of perspectives and raise questions about much mainstream environmental education particularly the heavy emphasis given to science in understanding environmental problems and to technology for solving them Contributions argue that there are other equally if not more important aspects to be considered notably our underlying attitudes towards nature and the quality of our underlying relationship with it They raise questions about what we mean by nature and how we come to know it most authentically in its many facets The overweening anthropocentrism and desire for mastery that informs much of current Western engagement with nature is revealed as stymying our ability properly to recognise nature s intrinsic value and moral standing Consideration is given to the need for a curriculum in which morality poetry and myth art and the humanities have key roles to play and where our understandings of the qualities of time and space that frame the curriculum are refreshed The majority of the chapters in this book were originally published in the journal *Environmental Education Research* **Leaders in Philosophy of Education**

Leonard J. Waks,2014-11-26 In the late 1950s plans were initiated to bring a higher level of professionalism to the training of educational professionals New projects included introducing contemporary scholarship from the humanities and social sciences into colleges of education to revitalize the education knowledge base In North America and the United Kingdom analytical philosophers were recruited to inaugurate a new philosophy of education Analytical philosophy of education soon spread throughout the English speaking world By the 1980s this analytical impulse had largely subsided Philosophers trained in analytical philosophy and their students turned to more ambitious normative pursuits related to problems of social justice

and democracy Meanwhile feminist philosophers opened up new issues regarding the education of women and the nature of teaching and knowing and a new wave of pragmatist philosophers turned to issues of educational policy By the 1990s Anglo American philosophers of education welcomed a dialogue with counterparts in Western Europe and the field responded to established trends in European philosophy ranging from critical theory and phenomenology to post structuralism New leaders emerged in philosophy of education representing all of these various strands This volume documents the emergence of contemporary philosophy of education as seen by those spearheading these trends "The" Journal of Speculative Philosophy ,1881 **The Publishers Weekly** ,1896 Making Sense of Education David Carr,2005-07-08 Making Sense of Education provides a contemporary introduction to the key issues in educational philosophy and theory Exploring major past and present conceptions of education teaching and learning this book makes philosophy of education relevant to the professional practice of teachers and student teachers as well of interest to those studying education as an academic subject The book is divided into three parts education teaching and professional practice issues concerning education the role of the teacher the relationship of educational theory to practice and the wider moral dimensions of pedagogy learning knowledge and curriculum issues concerning behaviourist and cognitive theories of learning knowledge and meaning curriculum aims and content and evaluation and assessment schooling society and culture issues of the wider social and political context of education concerning liberalism and communitarianism justice and equality differentiation authority and discipline This timely and up to date introduction assists all those studying and or working in education to appreciate the main philosophical sources of and influences on present day thinking about education teaching and learning **International Bulletin of Bibliography on Education** ,1994 *Publishers' Weekly* ,1878 **The Journal of Speculative Philosophy** ,1968 **Pre-school Theories and Strategies** Gerald Ashby,1972 The American School Board Journal William George Bruce,William Conrad Bruce,1898 EUDISED European Educational Research Yearbook 1997/98 ,1999 **Encyclopedia of Educational Theory and Philosophy** D.
