Philosophy Of Rudolph Carnap:

The Philosophy of Rudolf Carnap Rudolf Carnap, 1991 The first volume of the Library of Living Philosophers LLP appeared in 1939 the brainchild of the late Professor Paul A Schilpp Schilpp saw that it would help to eliminate confusion and endless sterile disputes over interpretation if great philosophers could be confronted by their capable philosophical peers and asked to reply As well as a number of critical essays with the chosen philosopher's replies to each essay each volume would include an intellectual autobiography and an up to date bibliography The LLP series has exceeded even Schilpp's expectations enabling great philosophers to do more than clarify by extending and elaborating their thoughts A volume in the Library of Living Philosophers is not merely a commentary on a philosopher's work it is a critical part of that work

Rudolf Carnap,1935 My endeavour in these pages is to explain the main features of the method of philosophizing which we the Vienna Circle use and by using try to develop further It is the method of the logical analysis of science or more precisely of the syntactical analysis of scientific language The purpose of the book as of the lectures is to give a first impression of our method and of the direction of our questions and investigations to those who are not yet acquainted with them From the Preface **The Philosophy of Rudolf**

Carnap and Twentieth-Century Thought A. W. Carus,2007-12-13 Rudolf Carnap 1891

1970 is widely regarded as one of the most important philosophers of the twentieth century Born in Germany and later a US citizen he was a founder of the philosophical movement known as Logical Empiricism He was strongly influenced by a number of different philosophical traditions including the legacies of both Kant and Husserl and also by the German Youth Movement the First World War in which he was wounded and decorated and radical socialism This book places his central ideas in a broad cultural political and intellectual context showing how he synthesised many different currents of thought to achieve a philosophical perspective that remains strikingly relevant in the twenty first century Its rich account of a philosopher s response to his times will appeal to all who are interested in the development of philosophy in the twentieth century **The Unity of Science (Routledge Revivals)**

Volume for Rudolf Carnap and Hans Reichenbach W. Spohn,1991-09-30 Rudolf Carnap was born on May 18 1891 and Hans Reichenbach on September 26 in the same year They are two of the greatest philosophers of this century and they are eminent representatives of what is perhaps the most powerful contemporary philosophical movement Moreover they founded the journal Erkenntnis This is ample reason for presenting on behalf of Erkenntnis a collection of essays in honor of them and their philosophical work I am less sure however whether it is a good time for resuming their philosophical impact their work still is rather part than historical basis of the present philosophical melting pot Their basic philosophical theses have currently it may seem not so high a standing but their impact can be seen in numerous detailed issues they have opened or

pushed forward lively fields of research which are still very actively pursued not only within philosophy but also in many neighboring disciplines Whatever the present balance of opinions about their philosophical ideas there is something even more basic in their philosophy than their tenets which is as fresh as stimulating as exemplary as ever I have in mind their way of philosophizing their conception of how to do philosophy It is always a good time for reinforcing that conception and if this volume would manage to do so it would fully serve its purpose *Carnap Brought Home* Steve Awodey, Carsten Klein, 2004 Rudolf Carnap 1891 1970 was the most important philosopher of the movement known as logical empiricism or logical positivism still the basis of much modern analytic philosophy It was long thought that this movement had been destroyed by the polemics of Quine Popper and Kuhn But recently leading philosophers have been re appraising this verdict It is no longer universally agreed that Quine or Popper won their disputes with Carnap and some have now been arguing that Kuhn s ideas are as Carnap himself thought perfectly compatible with logical empiricism This volume presents the latest contributions to this discussion from both sides and adds a number of new voices who look at Carnap from a more international point of view bringing out for instance the roots of his thought in Continental neo Kantianism and Dilthey s Lebensphilosophie and stressing his deep commitment to political and cultural change Carnap grew up in Jena and in his student days was an active member there of the utopian Sera Group part of the German youth movement At the same time he was one of Frege s few students and was deeply influenced by him Einführung in Die Symbolische Logik Rudolf Carnap, 1958-01-01 A clear comprehensive and rigorous treatment develops the subject from elementary concepts to the construction and analysis of relatively complex logical languages It then considers the application of symbolic logic to the clarification and axiomatization of theories in mathematics physics and biology Hundreds of problems examples and exercises 1958 edition Dear Carnap, Dear Van W. V. Quine, Rudolf Carnap, 2023-11-15 Rudolf Carnap and W V Quine two of the twentieth century s most important philosophers corresponded at length and over a long period of time on matters personal professional and philosophical Their friendship encompassed issues and disagreements that go to the heart of contemporary philosophic discussions Carnap 1891 1970 was a founder and leader of the logical positivist school The younger Quine 1908 began as his staunch admirer but diverged from him increasingly over questions in the analysis of meaning and the justification of belief That they remained close relishing their differences through years of correspondence shows their stature both as thinkers and as friends The letters are presented here in full for the first time The substantial introduction by Richard Creath offers a lively overview of Carnap s and Quine s careers and backgrounds allowing the nonspecialist to see their writings in historical and intellectual perspective Creath also provides a judicious analysis of the philosophical divide between them showing how deep the issues cut into the discipline and how to a large extent they remain unresolved Rudolf Carnap and W V Quine two of the twentieth century s most important philosophers corresponded at length and over a long period of time on matters personal professional and philosophical Their friendship encompassed issues and

disagreements th **Carnap and the Vienna Circle** Ramon Cirera,1994 It is not inaccurate to say that from 1928 to 1936 Carnap was a member of the Vienna Circle even though during this period he was not always present in Vienna During this years which spanned roughly the period from the Aufbau to Testability and Meaning he worked or at least discussed frequently with the members of the group However traditionally it has been difficult to form a proper view of the development of Carnap's ideas throughout this period mainly because of three errors which have persisted in the commonly accepted historical interpretation of Carnap and the Vienna Circle emphasis on the Circle as a unit rather than a collective of individuals insistence on verificationism as the defining characteristic of Logical Positivism and the systematic abstraction of the work of the Circle from its historical context As against this historically distorted image this book argues for an alternative reading evaluating the different influences on Carnap of Schlick Wittgenstein Neurath and Popper and making sense of Carnap's evolution from physicalism to phenomenalism and the syntactic point of view *The Philosophy of Rudolf Carnap* Maria Grazia Sandrini,2024
