

THE RELEVANCE OF PSYCHICAL RESEARCH TO PHILOSOPHY

C. D. Broad

Published in the *Philosophy* 24 (1949): 291-309. Reprinted in C. D. Broad, *Religion, Philosophy and Psychical Research* (Routledge & Keagan Paul, 1953).

I will begin this paper by stating in rough outline what I consider to be the relevance of psychical research to philosophy, and I shall devote the rest of it to developing this preliminary statement in detail.

In my opinion psychical research is highly relevant to philosophy for the following reasons. There are certain limiting principles which we unhesitatingly take for granted as the framework within which all our practical activities and our scientific theories are confined. Some of these seem to be self-evident. Others are so overwhelmingly supported by all the empirical facts which fall within the range of ordinary experience and the scientific elaborations of it (including under this heading orthodox psychology) that it hardly enters our heads to question them. Let us call these *Basic Limiting Principles*. Now psychical research is concerned with alleged events which seem *prima facie* to conflict with one or more of these principles. Let us call any event which seems *prima facie* to do this an *Ostensibly Paranormal Event*.

A psychical researcher has to raise the following questions about any ostensibly paranormal event which he investigates.

1. Did it really happen? Has it been accurately observed and correctly described?
2. Supposing that it really did happen and has been accurately observed and correctly described, does it really conflict with any of the basic limiting principles? Can it not fairly be regarded merely as a strange coincidence, not outside the bounds of probability? Failing that, can it not be explained by reference to already known agents and laws? Failing that can it not be explained by postulating agents or laws or both, which have not hitherto been recognized, but which fall within the framework of accepted basic limiting principles?

Now it might well have happened that every alleged ostensibly paranormal event which had been carefully investigated by a competent psychical researcher was found either not to have occurred at all, or to have been misdescribed in important respects, or to be a chance-coincidence not beyond the bounds of probability, or to be susceptible of an actual or hypothetical explanation within the framework of the basic limiting principles. If that had been so, philosophy could afford to ignore psychical research; for it is no part of its duty to imitate the White Knight by carrying a mousetrap when it goes out riding, on the of chance that there might be mice in the saddle. But that is not how things have in fact turned out. It will be enough at present to refer to a single instance, viz., Dr. Soal's experiments on card-guessing with Mr. Shackleton as subject, of which I gave a full account in *Philosophy* in 1944. There can be no doubt that the events described happened and were correctly reported, that the odds against chance-
