John Gascoigne

Philosophy Of The Enlightenment:

The Philosophy of the Enlightenment Ernst Cassirer, 1951 The present book aims to be both more and less than a monograph on the philosophy of the Enlightenment It is much less for the primary task of such monograph would be to offer the reader a wealth of detail and to trace the genesis and development of all the special problems of this philosophy *The Philosophy of the Enlightenment* John Hibben, 2018-01-19 THE age of the Enlightenment has a peculiar interest and value for the student of the history of philosophy The philosophical output of this period is unusually rich and significant embracing as it does the classical writings of Locke Berkeley Hume Leibniz Rousseau and Kant and therefore may well be studied for the material which these separate contributions severally contain But more than this the eighteenth century philosophy is a period in which a great movement of thought is exhibited and that too on a large and conspicuous stage England France Germany form its settings It begins with Locke and is completed in Kant And whatever significance Kant may possess for the philosophical world to day attaches also to this period for this period served to open the way for the critical philosophy of the great master which is its appropriate culmination Descartes and the Enlightenment Peter A. Schouls, 1989 Peter Schouls examines the role played by the concepts of freedom mastery and progress in Descartes writings arguing that these ideas express a vital and fundamental feature of Descartes thought These theories also occupy a central position in the thought of the Enlightenment Since the more contentious claim is that they function centrally in Descartes works Schouls presents a careful and detailed examination of the conjunction and use of these ideas in Descartes writings This examination warrants the conclusion that they play the same role in Descartes works as they do in writings typical of the Enlightenment **The Philosophy of the Enlightenment (Routledge Revivals)** Lucien Goldmann, 2009-11-02 In this reissue originally published in English in 1973 French philosopher Lucien Goldmann turns his attention to the Enlightenment of the eighteenth century the great age of liberalism and individualism and analyses the mental structures of the outlook of the philosophes who showed that the ancien regime and the privileges of the Church were irrational anachronisms In assessing the strengths and limitations of individualism Goldmann considers the achievements and limitations of the Enlightenment He discusses the views of Hegel and Marx and examines the relation between liberal scepticism and traditional Christianity to point the way to the possible reconciliation of the two seemingly incompatible world visions of East and West today *Enlightenment Contested* Jonathan I. Israel, 2006-10-12 This is a managerial survey and reinterpretation of the Enlightenment The text offers an assessment of the nature and development of the important currents in philosophical thinking arguing that supposed national enlightenments are of less significance than the rift between conservative and radical thought **Philosophers of the Enlightenment** Peter Gilmour, 1990-01-01 This is the first clear and comprehensive introduction to the philosophers of the Enlightenment Nine contemporary specialists lead the student gently through Enlightenment thought by looking at the lives and writings of individual philosophers such as Leibniz Locke Berkeley Hume Reid Kant Voltaire and Fourier This is an

introduction to a complex subject which should become recommended reading for students of philosophy from school to university level as well as anyone interested in Enlightenment thought Contents PETER GILMOUR Introduction STUART BROWN 1 eibniz and the Fashion for Systems and Hypotheses JOHN WILLIAMSON 2 Boyle and Locke on Material Substance STEPHEN CLARK 3 Soft as the Rustle of a Reed from Cloyne Berkeley ANGUS J MACKAY 4 David Hume R F STALLEY 5 Common Sense and Enlightenment the Philosophy of Thomas Reid MURRAY MACBEATH 6 Kant CHRISTOPHER BERRY 7 Adam Smith Commerce Liberty and Modernity PETER JIMACK 8 Voltaire I D LLOYD JONES 9 Charles Fourier Faithful Pupil of the Enlightenment Index R The Philosophy of the Enlightenment John Grier Hibben,1910 Radical Enlightenment Jonathan Irvine Israel,2001 Readership Readers with an interest in the European Enlightenment intellectual and cultural historians scholars and students of philosophy *Scepticism in the Eighteenth Century: Enlightenment, Lumières, Aufklärung* Sébastien Charles,Plínio J. Smith,2014-07-08 The Age of Enlightenment has often been portrayed as a dogmatic period on account of the veritable worship of reason and progress that characterized Eighteenth Century thinkers Even today the philosophes are considered to have been completely dominated in their thinking by an optimism that leads to dogmatism and ultimately rationalism However on closer inspection such a conception seems untenable not only after careful study of the impact of scepticism on numerous intellectual domains in the period but also as a result of a better understanding of the character of the Enlightenment As Giorgio Tonelli has rightly observed the Enlightenment was indeed the Age of Reason but one of the main tasks assigned to reason in that age was to set its own boundaries Thus given the growing number of works devoted to the scepticism of Enlightenment thinkers historians of philosophy have become increasingly aware of the role played by scepticism in the Eighteenth Century even in those places once thought to be most given to dogmatism especially Germany Nevertheless the deficiencies of current studies of Enlightenment scepticism are undeniable In taking up this question in particular the present volume which is entirely devoted to the scepticism of the Enlightenment in both its historical and geographical dimensions seeks to provide readers with a revaluation of the alleged decline of scepticism At the same time it attempts to resituate the Pyrrhonian heritage within its larger context and to recapture the fundamental issues at stake The aim is to construct an alternative conception of Enlightenment philosophy by means of philosophical modernity itself whose initial stages can be found herein *Theæ philosophy of enlightenment* Lucien Goldmann,1968 An Answer to the Question: 'what is Enlightenment?' Immanuel Kant,2010-10-26 First published in 1784 Kant's immortal essay is now a part of the Penguin Great Ideas series This series is ideal for readers who want to explore and savor the Great Ideas that have shaped our world The Philosophy of the Enlightenment; the Christian Burgess and the Enlightenment. Science, Philosophy and Religion in the Age of the Enlightenment John Gascoigne,2024-10-28 Taking as its focus the wide ranging character of the Enlightenment both in geographical and intellectual terms this second collection of articles by John Gascoigne explores this movement s filiation and influence in a range of contexts In contrast to some recently influential views it emphasises the evolutionary rather than the revolutionary character of the Enlightenment and its ability to change society by adaptation rather than demolition This it does by reference firstly to developments in Britain tracing the changing views of history in relation to the Biblical account the ideological uses of science and particularly the work of Newton and their connections to developments in moral philosophy and the teaching of science and philosophy in response to Enlightenment modes of thought The collection then turns to the wider global setting of the Enlightenment and the way in which that movement served to provide a justification for European exploration and expansion developments which found one of their most potent embodiments in the diverse uses of mapping The collection concludes with an exploration of the interplay between the experience of Pacific contact and the currents of thought which characterised the Enlightenment in Germany

The Philosophy of Virginia Woolf A. O. Frank,2001 This book is well calculated to bring about the long awaited breakthrough in the appreciation of Virginia Woolf as an intellectual author A O Frank argues that in Woolf s mature novels we find a

coherent body of philosophical thought presented in lyrical prose which is nonetheless precisely argued In sections of meticulously precise close reading Frank analyzes the complex mechanisms of textual engineering through which Woolf's ideas find expression Educated in the German Continental tradition of Aesthetics and Philosophy the author believes that for a thought to be thought out properly it needs to be thought out philosophically Speaking from a fruitfully intermediate position between British and Continental culture she highlights and explicates Woolf's philosophical thought by analyzing carefully selected passages from existential cosmological and epistemological texts by Nietzsche as well as Heidegger the later Wittgenstein and Derrida

The Enlightenment Anthony Pagden, 2013-05-23 The Enlightenment and Why It Still Matters tells nothing less than the story of how the modern Western view of the world was born Cultural and intellectual historian Anthony Pagden explains how and why the ideal of a universal global and cosmopolitan society became such a central part of the Western imagination in the ferment of the Enlightenment and how these ideas have done battle with an inward looking tradition oriented view of the world ever since Cosmopolitanism is an ancient creed but in its modern form it was a creature of the Enlightenment attempt to create a new science of man based upon a vision of humanity made up of autonomous individuals free from all the constraints imposed by custom prejudice and religion As Pagden shows this new science was based not simply on cold calculating reason as its critics claimed but on the argument that all humans are linked by what in the Enlightenment were called sympathetic attachments The conclusion was that despite the many tribes and nations into which humanity was divided there was only one human nature and that the final destiny of the species could only be the creation of one universal cosmopolitan society This new human science provided the philosophical grounding of the modern world It has been the inspiration behind the League of Nations the United Nations and the European Union Without it international law global justice and human rights legislation would be unthinkable As Anthony Pagden argues passionately and persuasively in this book it is a legacy well worth preserving and one that might yet come to inherit the earth **A**

History of Philosophy with Especial Reference to the Formation and Development of Its Problems and Conceptions Wilhelm Windelband, 1895 **Enlightenment and Action from Descartes to Kant** Michael Losonsky, 2001-08-13 Kant believed that true enlightenment is the use of reason freely in public This book systematically traces the philosophical origins and development of the idea that the improvement of human understanding requires public activity Michael Losonsky focuses on seventeenth century discussions of the problem of irresolution and the closely connected theme of the role of volition in human belief formation This involves a discussion of the work of Descartes Hobbes Locke Spinoza and Leibniz Challenging the traditional views of seventeenth century philosophy and written in a lucid non technical language this book will be eagerly sought out by historians of philosophy and students of the history of ideas
