## **Apple Music Guide:**

**Apple Music: A Guide for Beginners** Steve Markelo, 2015-07-29 The Apple Music is a new music streaming playing service that has been introduced by Apple Inc The service allows the Apple users to be able to choose the music they would like to hear on demand When users sign up for this service they will get a combination of the Beats 1 radio station and the Connect blog for artists to share information with their fans The service also allows the users to get recommendations based on their taste and it can be integrated with the popular Siri command service The complete service is similar to other streaming services however it is different based on the additional features offered and exclusive content It aims to stand out by not using computer algorithms to determine the tastes of user but by using the human element to build more precise catalogs The added exclusive content will provide a direct link to the artists in which fans can get content that is unfiltered and unedited They can make comments and see the direct inspiration of the artists

*Mastering Apple Music* Adidas Wilson, Apple Music is to quote the company All the ways you love music All in one place In non marketing lingo Apple Music is built around two major components iCloud Music Library which combines your purchased music library and ripped tracks in one

place and the Apple Music streaming catalog where you can find more than 10 million tracks from artists around the world. These two parts live side by side in the Music app. You can keep each separate by only streaming the Apple Music catalog or you can add streaming songs to your offline Music library where they can be mixed into playlists offline or publicly shareable or shuffled amongst the rest of your music. Apple Music also offers a massive recommendation and browsing area for its streaming catalog. As you listen to songs in the Music app, Apple collects data about your tastes and drops daily custom curated playlists in the app for you to listen to along with a weekly algorithmic New Music mix that suggests songs and artists you might like. You can also poke around the entire streaming catalog's array of new music curated playlists, music videos and more.
