Rochow,2012-11-28 Bachelor Thesis from the year 2010 in the subject Psychology Social Psychology grade 1 0 Uppsala University language English abstract In the age of social networking and music streaming playlists are a common tool for organizing sharing or exchanging music in the digital realm Most research however emphasizes mainly political legal and ethical constraints of music sharing practices yet neglects their social impact Thus this paper investigates the social psychological foundation of the playlist and analyses its functionality in establishing social relations and communication Following the theories of Cooley Mead Simmel and Solomon I conducted and analysed interviews with young Swedish men and women in which they talked about their experiences and attitudes towards playlists Moreover all participants compiled their own personal playlist based on certain personality traits which were aimed to be recognized by the others during the focus group discussion The analysis of the data yields the following conclusions The playlist is a social object facilitating new forms of communication The social nature of the playlist is based on the transformation from objective into subjective culture By internalizing new technologies such as the playlist objects gain social value thus mere musical content becomes a social form It is through sharing and exchanging musical compilations that the playlist as a social form serves as a vehicle or medium facilitating new forms of sociation and communication The communicative function of the playlist is due to its construction through emotions as uniquely subjective judgements based on the I as an emotional self feeling Thus musical compilations take part in the self construction process and can serve as a tool for the symbolic expression of the self Moreover the analysis points out that there are differences in how well certain parts of the self can be communicated by a playlist Emotional expressions of the self are translated into particular universal music patterns most successfully Furthermore the analysis shows that some people like to browse through the playlists of others and judge them thereupon which results in some type of musical voyeurism termed playlistism In conclusion I argue that the musical playlist is both socially implicated and socially implicating

the Roommate Mistake Elizabeth Stevens, 2021-06-08 When I find a half naked guy standing in my dormitory at my new boarding school I assume he's my roommate's boyfriend He introduces himself as Alex and I introduce myself as Lottie When he tells me he's Sasha and was expecting Elliott I see what happened Someone knew I was a girl or he was a guy and made some glaringly incorrect assumptions about the other one meaning we were assigned as roommates The new dorm mistress tells us we're stuck with each other at least for the short term What starts out as playful ribbing between my studious self and the ripped jock becomes something a little more friendly as his friends take me in as one of their own Soon I'm their ticket to the ways of the female heart But not my heart Because I mean no one falls in love just because of a roommate mistake For those Keeping Up Appearances and Accidentally Perfect fans here's a return to that style and vein You'll find this story is a bit of a combination of the two there's a bit more swearing than KUA but it's a little cleaner than AP Like both it's about growing up finding and accepting yourself being with people who bring out the best in you and getting the guy that you might not think you want but that you need and more importantly needs you Hope you enjoy Please be aware that this story is set in Australia and therefore uses Australian English spelling and syntax Not recommended for younger readers due to mature content
