future of work managing the workforce optimizing process performance automation digitalization and AI *Leadership 2.0 in processes of a sustainable change* Prof. Dr. Michael Kurwan, 2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2.0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover *AI: Game On* Tim Trumper, 2024-03-06 *AI Game On* is written for today's business leaders who seek to understand how AI can be leveraged for increased sustainability improved competitive positioning and or to drive better customer shareholder and societal outcomes The aim of *AI Game On* is to help business leaders thrive in a world that is more data driven and AI directed providing readers with frameworks methods and real examples of constructive ethical governance of AI deployment as well as harmful models which organisations and society must avoid *AI Game On* attacks the vexing and strategic dilemma for directors and executives whose job is to decide who or what decides The book answers the questions of how and why an organisation would and could delegate decisions to AI and explores the consequences of such decision making *AI Game On* strives to make sense of the trade offs between decisions of AI and or decisions of humans *AI Game On* is jam packed with compelling use cases demonstrating how AI can break through complex and difficult business problems to create opportunities for the world that were unimaginable only twelve months ago Insights from *AI Game On* will prove both valuable and advantageous for leaders in commercial government or not for profit sectors alike **Califailure** Steve Hilton, 2025-03-25 Steve Hilton tackles the literally burning question What will it take to save California California is a model for the nation Governor Gavin Newsom keeps telling us We're following a formula for success In *Califailure* Hilton compellingly captures exactly where this far left experiment has gone fundamentally catastrophically wrong Great cities like

Los Angeles San Francisco and Oakland collapsed into squalor as crime and homelessness were allowed to explode The state that used to pride itself as the home of innovation and opportunity became the state with the worst rate of poverty highest unemployment and most hostile business climate in America as well as the highest taxes How did this happen and what is needed to turn things around Hilton identifies the nine key pathologies from Elitism to Cronyism to Narcissism that define the ideology at the heart of California s decline And he lays out a comprehensive program of policy reform CaliFuture that will restore the Golden State to its rightful place as the very best of America Californians are starting to wake up from the long and fitful nightmare In 2024 far left politicians were removed from leadership positions in San Francisco and Los Angeles Proposition 36 which in the words of its proponents makes crime illegal again passed overwhelmingly with majorities in every county Califailure is what happens when Democrats get everything they want Increasingly it s not what Californians want This book explains why America must reject it too Transformers in Action Nicole Koenigstein,2025-11-25
