War takes a critical look at the systems we use and how we ended up in a society that values data over personal liberty and commerce over the public good. It tells a compelling and previously untold story of how our ideas of information and knowledge reflect the century of war that has militarized our worldview. Author David Lankes's work has been funded by organizations such as The MacArthur Foundation, The Institute for Library and Museum Services, NASA, The U.S. Department of Education, The U.S. Department of Defense, The National Science Foundation, and The U.S. State Department. This his latest book will help all of us learn how war has shaped our world and how to begin to create an agenda to stand down weaponized data and a media that seeks to own our personal even intimate data like one owns a gold mine.

Founders and Organizational Development Stephen Block, Katrina Miller-Stevens, 2021-06-28. Founders and Organizational Development: The Etiology and Theory of Founder's Syndrome is designed to help today's researchers, faculty, students, and practitioners become familiar with the etiology and dynamics of Founder's Syndrome as an organizational condition challenging nonprofit, nongovernmental, social enterprise, and for-profit and publicly traded organizations. The book uses applied social and psychological theories and concepts to peel away the layers of an organizational enigma, revealing three causes of Founder's Syndrome and insight into the power and privileges assumed by founders who engage in undesirable and self-destructive behaviors leading to their termination, going from hero status to antihero. Researchers, instructors, students, and practitioners will find thought-provoking case studies from the real world of organization development practice. Segments from interviews during interventions reveal the type of emotional turmoil experienced in organizations where founder's syndrome is present. Insight is provided into accounts of well-known founders who were terminated or forced to resign. The unique features of this book include integrating theory into practice, describing a new theory about the psychological reaction of founder's syndrome victims, prevention ideas when designing new organizations, strategies for intervention using content based on research and organization development consultation experiences, and integrating feedback from students who have launched organizations.
