Slender Man Is Coming Trevor J. Blank, Lynne S. McNeill, 2018-09-21 The essays in this volume explore the menacing figure of Slender Man the blank faced long limbed bogeyman born of a 2009 Photoshop contest who has appeared in countless horror stories circulated on and offline among children and young people Slender Man is arguably the best known example in circulation of creepypasta a genre derived from cypypasta which in turn derived from the phrase copy paste As narrative texts are copied across online forums they undergo modification annotation and reinterpretation by new posters in a folkloric process of repetition and variation Though by definition legends deal largely with belief and possibility the crowdsourced mythos behind creepypasta and Slender Man suggests a distinct awareness of fabrication Slender Man is therefore a new kind of creation one intentionally created as a fiction but with the look and feel of legend Slender Man Is Coming offers an unprecedented folkloristic take on Slender Man analyzing him within the framework of contemporary legend studies creepypastas folk belief and children s culture This first folkloric examination of the phenomenon of Slender Man is a must read for anyone interested in folklore horror urban legends new media or digital cultures Contributors Timothy H Evans Andrea Kitta Mikel J Koven Paul Manning Andrew Peck Jeffrey A Tolbert Elizabeth Tucker *Feminist Cyberspaces* Sharon Collingwood, Alvina E. Quintana, Caroline J. Smith, 2012-01-17 *Feminist Cyberspaces* Pedagogies in Transition is a collection of essays exploring the ways in which new media technologies are being used in the feminist classroom The collection has been structured to reflect the multifaceted nature of education today Learning takes place on a personal level through independent study and social media it takes place at a local level in our classrooms and lecture halls but it is also increasingly taking place on a global scale as new technologies foster international collaboration between individuals and organizations In addition there is a growing acceptance of learning in the collaborative 3D classrooms of virtual worlds These educational spaces are not mutually exclusive as the contributions to this volume make clear The anthology explores how technology is being used in antiviolence teaching art education HIV and AIDS education and other specialized topics but it also gives many examples of innovations in teaching introductory courses The technology used ranges from the implementation of course management systems for large university classes to the use of digital storytelling in small groups outside the university It also explores technology for removing barriers to people with disabilities in both traditional and online classrooms The collection is not a how to book but it does use practical experience as a basis for feminist theorizing of the classroom All of the essays look at the use of new technology in the light of feminist pedagogy seeking new ways to foster provocative creative and non hierarchical learning that transcends the physical boundaries of the university Getting an Information Security Job For Dummies Peter H.
