Public Policies And The Misuse Of Forest Resources:

Public Policies and the Misuse of Forest Resources World Resources Institute, 1988-09-30 Six contributors explore the role of governments in accelerating the rate of forest destruction by providing direct and indirect subsidies to support what would otherwise be non commercial logging operations Without these financial incentives most timber operations in the tropics would cease In a series of country by country investigations including examples from the developed and developing worlds this book documents the government policies that are leading to the misuse of forest resources Each is written by an authority on the country and each contains descriptive analytical and empirical material on key policies and their effects The final country analysis focuses on the United States where the consequences of the subsidized timber sales by the US Forest Service from most of the national forests are discussed The book concludes with an overview of the impact of forest policies and the role of bilateral and multilateral agencies in their formulation By directing attention toward the political dimension involved in forest clearance this book will provide a clearer insight into the basic reasons why forests continue to be destroyed despite the outcry raised by conservationists The Forest for the Trees? Robert C. Repetto, 1988 Experts have clearly established the extent of forest decline and likely economic social and environmental consequences They have also discussed deforestation s principal causes This report goes further by showing how governments committed in principle to conservation and wise resource use are aggravating the losses of forests under their stewardship through mistaken policies Such policies by and large were adopted for worthy objectives industrial or agricultural growth regional development job creation or poverty alleviation But this study finds such objectives typically have not been realized or have been attained only at excessive costs *Public Policies and the Misuse of Forest Resources* R. REPETTO, 1998 **Public policies and the misuse of forest resources** Robert Repetto, 1988 Why Governments Waste Natural Resources William Ascher, 1999 Drawing on 16 case studies from Africa Asia and Latin America reveals the complex political and programmatic reasons why government officials in developing countries often willfully adopt wasteful natural resource policies Environmentally Harmful Subsidies Policy Issues and Challenges OECD, 2003-09-05 Proceedings of the OECD Workshop on Environmentally Harmful Subsidies November 2002 For the first time experts from a variety of backgrounds had the opportunity to take stock of and share technical knowledge of subsidies and their impacts **Environment and the poor development** H. Jeffrey Leonard, 1989-01-01 This volume one of the ODC s U S Third World Policy Perspectives series offers useful steps for policymakers concerned with the critical challenges of integrating environment and development concerns Jessica Tuchman Matthews World Resources Institute Six out of every ten of the world s people are being inexorably pushed by agricultural modernization and continuing high population growth rates into ecologically vulnerable environments tropical forests dryland and hilly areas and the fringes of great urban centers Unless development strategies support their capabilities to ensure their own survival the 470 million people living in these vulnerable areas will be forced to meet their short term need

to survive at the cost of long term ecological sustainability and the well being of future generations In response to these startling statistics the authors call for new policies and new forms of collaboration among participants at the local national and international levels They offer practical and stimulating recommendations to bring together population planners water engineers health professionals bankers among others to find solutions to both poverty and environmental problems
