Environmental Thought in the Graeco-Roman World Orietta Dora Cordovana,2024-09-23 The debate that has arisen around the concept of the Anthropocene forms the basis of this book It investigates certain forms of environmental interrelation and ecological sensitivity in the Graeco Roman world The notions of environmental depletion exploitation and loss of plant species and the ancients knowledge of species diversity are the main cores of the research The aim is to interrogate historical sources and diverse evidence and to analyse political and socioeconomic structures according to a reading focused on possible antecedents cultural prodromes alignments of thought or divergencies with respect to major modern environmental problems and current ecological conceptualisations As a result sustainable behaviour biodiversity and its practical uses can also be identified in ancient societies In the context of environmental studies this contribution is placed

Pliny's Encyclopedia Aude Doody, 2010-02-11 The Elder Pliny s *Natural History* is one of the largest and most extraordinary works to survive from antiquity It has often been referred to as an encyclopedia usually without full awareness of what such a characterisation implies In this book Dr Doody examines this concept and its applicability to the work paying far more attention than ever before to the varying ways in which it has been read during the last two thousand years especially by Francis Bacon and Denis Diderot This book makes a major contribution not just to the study of the Elder Pliny but to our understanding of the cultural processes of ordering knowledge widespread in the Roman Empire and to the reception of classical literature and ideas
