Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 **Radical** Kate Pickert,2019-10-01 In this powerful and unflinching page turner New York Times a healthcare journalist examines the science history and culture of breast cancer As a health care journalist Kate Pickert knew the emotional highs and lows of medical treatment well but always from a distance through the stories of her subjects That is until she was unexpectedly

diagnosed with an aggressive type of breast cancer at the age of 35 As she underwent more than a year of treatment Pickert realized that the popular understanding of breast care in America bears little resemblance to the experiences of today's patients and the rapidly changing science designed to save their lives After using her journalistic skills to navigate her own care Pickert embarked on a quest to understand the cultural scientific and historical forces shaping the lives of breast cancer patients in the modern age Breast cancer is one of history's most prolific killers Despite billions spent on research and treatments it remains one of the deadliest diseases facing women today From the forests of the Pacific Northwest to an operating suite in Los Angeles to the epicenter of pink ribbon advocacy in Dallas Pickert reports on the turning points and people responsible for the progress that has been made against breast cancer and documents the challenges of defeating a disease that strikes one in eight American women and has helped shape the country's medical culture Drawing on interviews with doctors economists researchers advocates and patients as well as on journal entries and recordings collected over the author's treatment Radical puts the story of breast cancer into context and shows how modern treatments represent a long overdue shift in the way doctors approach cancer and disease itself The New York Times Index, 2008 **Her-2** Robert Bazell, Amy Bernstein, 1998 The dramatic account of a remarkable new breast cancer drug from its creation to the moving tales of women whose lives it is saving The chief correspondent of NBC News Robert Bazell presents the riveting account of how this drug moved from the lab to the bedside **The Journal of Immunology**, 2007 **Proceedings of the National Academy of Sciences of the United States of America** National Academy of Sciences (U.S.), 2007 **Her-2** Robert Bazell, 2011-04-27 Two years after she underwent a mastectomy and chemotherapy Barbara Bradfield's aggressive breast cancer had recurred and spread to her lungs The outlook was grim Then she took part in Genentech's clinical trials for a new drug Five years later she remains cancer free Her 2 is the biography of Herceptin the drug that provoked dramatic responses in Barbara Bradfield and other women in the trials and that offers promise for hundreds of thousands of breast cancer patients Unlike chemotherapy or radiation Herceptin has no disabling side effects It works by inactivating Her 2 neu a protein that makes cancer cells grow especially quickly produced by a gene found in 25 to 30 percent of all breast tumors Herceptin caused some patients' cancers to disappear completely in others it slowed the progression of the disease and gave the women months or years they wouldn't otherwise have had Herceptin is the first treatment targeted at a gene defect that gives rise to cancer It marks the beginning of a new era of treatment for all kinds of cancers Robert Bazell presents a riveting account of how Herceptin was born Her 2 is a story of dramatic discoveries and strong personalities showing the combination of scientific investigation money politics ego corporate decisions patient activism and luck involved in moving this groundbreaking drug from the lab to a patient's bedside Bazell's deft portraits introduce us to the remarkable people instrumental in Herceptin's history including Dr Dennis Slamon the driven UCLA oncologist who played the primary role in developing the treatment Lily Tartikoff wife of television executive Brandon Tartikoff who tapped into Hollywood money and

glamour to help fund Slamon's research and Marti Nelson who inspired the activists who lobbied for a compassionate use program that would allow women outside the clinical trials to have access to the limited supplies of Herceptin prior to FDA approval of the drug. And throughout there are the stories of the heroic women with advanced breast cancer who volunteered for the trials risking what time they had left on an unproven treatment. Meticulously researched, written with clarity and compassion, Her 2 is masterly reporting on cutting edge science. F & S Index United States Annual, 2005

Bibliography of Agriculture, 1990-04 **Breast Cancer: From Bench to Personalized Medicine** Saima Shakil Malik, Nosheen Masood, 2022-05-14. This book provides detailed information on the etiology, pathogenesis, diagnosis, prognosis, and treatment strategies for breast cancer. The first section of the book presents epidemiology, risk factors, histopathological immunohistochemistry, and molecular subtypes of breast cancer based on the receptor status. It also discusses the association of breast cancer with other hormone-sensitive cancers. The second section of the book covers BRCA1 and BRCA2 associated breast carcinogenesis, early stage progression of breast cancer, and noninvasive biomarkers for the early detection of breast cancer. It also discusses the role of epigenetic modifications and non-coding RNAs in breast cancer metastasis and explores these as the biomarkers and therapeutic targets for breast cancer therapy. Further, it discusses the role of fibrinolytic mechanisms and circulating tumor cells in breast cancer diagnosis, prognosis, and treatment. The book also provides an update on oral poly ADP-ribose polymerase (PARP) inhibitors to treat breast cancer. Finally, it offers potential new options for personalized therapies for breast cancer patients, including optimizing drug dosage and identifying genetic changes associated with cancer symptom occurrence and severity.
