The Sound of Broadway Music Steven Suskin, 2011-06-03 Broadway's top orchestrators Robert Russell Bennett, Don Walker, Philip J. Lang, Jonathan Tunick are names well known to musical theatre fans but few people understand precisely what the orchestrator does. *The Sound of Broadway Music* is the first book ever written about these unsung stars of the Broadway musical whose work is so vital to each show's success. The book examines the careers of Broadway's major orchestrators and follows the song as it travels from the composer's piano to the orchestra pit. Steven Suskin has meticulously tracked down thousands of original orchestral scores piecing together enigmatic notes and notations with long forgotten documents and current interviews with dozens of composers, producers, conductors and arrangers. The information is separated into three main parts: a biographical section which gives a sense of the life and world of twelve major theatre orchestrators as well as incorporating briefer sections on another thirty arrangers and conductors; a lively discussion of the art of orchestration written for musical theatre enthusiasts including those who do not read music; a biographical section which gives a sense of the life and world of twelve major theatre orchestrators as well as incorporating briefer sections on another thirty arrangers and conductors; and an impressive show-by-show listing of more than seven hundred musicals in many cases including a song-by-song listing of precisely who orchestrated what along with relevant comments from people involved with the productions. Stocked with intriguing facts and juicy anecdotes many of which have never before appeared in print, *The Sound of Broadway Music* brings fascinating and often surprising new insight into the world of musical theatre.

The Woodwinds: Perform, Understand, Teach James Byo, 2016-06-17 *The Woodwinds Perform, Understand, Teach* provides comprehensive coverage about the woodwind family of musical instruments for prospective instrumental music teachers. What sets this book apart is its focus on how to teach the instruments. Preparing students in the how of teaching is the ultimate goal of the woodwind class and the ultimate goal of this book which organizes information by its use in teaching beginning instrumentalists. In developing performance and understanding pre-service teachers are positioned to learn to teach through performance contrasted with an old school belief that one must first spend much time tediously trying to understand how things work before playing the instruments. The book is organized in three parts: Preliminaries, Teaching the Instruments, and Foundations. Chapters in Teaching the Instruments are organized by instrument: flute, clarinet, saxophone, oboe, bassoon, and within each instrument according to how an effective teacher might organize experiences for novice learners. Basic embouchure and air stream are covered first followed by instrument assembly then hands and holding. Embouchure coverage returns in greater depth then articulation and finally the

mechanism which includes sections on the instruments of the family transposition range special fingerings tuning and intonation and reeds In Foundations topics are situated in big picture contexts calling attention to the broad applicability of information across instruments Guide to Teaching Woodwinds Frederick William Westphal,1985 Guide to Teaching Woodwinds is written primarily for the college student who is preparing for instrumental teaching although the woodwind teacher or player will find it useful also At a time when teacher education programs allow only a minimal amount of time for the specialized study of instrumental teaching a text that not only provides the basics but includes essential details for future reference is essential This text attempts to meet that need **Catalog of Copyright Entries** Library of Congress.
