Paul Delaroche Patricia Smyth, 2022-06-15 Paul Delaroche Painting and Popular Spectacle explores the connections between painting and an emergent popular visual culture in the early nineteenth century which included new forms of optical entertainment such as Panoramas and Dioramas and innovation in fields such as illustration art reproduction and stage decor Delaroche's paintings caused a sensation at the Paris Salon with critics comparing the emotional response they elicited to that of popular melodrama Yet his appeal to a certain type of spectator lay behind the increasingly hostile criticism to which his works were subjected and has in our own time led to his uncertain status in the art historical canon This book focuses on Delaroche's popularity with a newly expanded audience Lacking in specialist knowledge but nevertheless keen to engage with and deeply affected by art the behaviour of this new public prompted lively discussions about who has the right to judge art and on what grounds Working across disciplinary boundaries this book proposes a new reading both of Delaroche and of the connections between the arts in this period The artist emerges as a figure at the cutting edge of an emergent trans medial popular visual culture in which we see the formation of modern spectatorship

Playing Sick Meredith Conti, 2018-07-27 Few life occurrences shaped individual and collective identities within Victorian era society as critically as witnessing or suffering from illness The prevalence of illness narratives within late nineteenth century popular culture was made manifest on the period's British and American stages where theatrical embodiments of illness were indisputable staples of actors repertoires Playing Sick Performances of Illness in the Age of Victorian Medicine reconstructs how actors embodied three of the era's most

provocative illnesses tuberculosis drug addiction and mental illness In placing performances of illness within wider medicocultural contexts Meredith Conti analyzes how such depictions confirmed or resisted salient constructions of diseases and the diseased Conti's case studies which range from Eleonora Duse's portrayal of the consumptive courtesan Marguerite Gautier to Henry Irving's performance of senile dementia in *King Lear* help to illuminate the interdependence of medical science and theatre in constructing nineteenth century illness narratives Through reconstructing these performances Conti isolates from the period's acting practices a lexicon of embodied illness a flexible set of physical and vocal techniques that performers employed to theatricalize the sick body In an age when medical science encouraged a gradual decentering of the patient from their own diagnosis and treatment late nineteenth century performances of illness symbolically restored the sick to positions of visibility and consequence
