Locke, Dolly Lambdin, 2003 Features 30 clear summaries of studies on elementary physical education instruction class management program design workplace conditions and more Includes practical tips for navigating the typical research report to improve the ability of teachers to glean new ideas and useful facts from research Shows the differences between the vantage point of the researcher and that of the teaching practitioner and how to find the common ground between the two Covers new teaching strategies measuring instruments and program alternatives and how to think about teaching physical education in more sophisticated ways This textbook and reference provides teachers with valuable insights for using research to improve their teaching **Putting Research to Work in Elementary Physical Education** Conversations in the Gym lets readers eavesdrop on a career long conversation between a well known scholar and a top notch teacher who have a combined 75 years of professional physical education experience Together they take a close look at 30 studies to help educators learn how to glean valuable information from research The book opens a window into the minds of 69 scholars as they puzzle about teachers students and programs Readers do not need a highly technical vocabulary advanced scientific or mathematical knowledge or a detailed background concerning research methods The authors have provided translations in the form of brief nontechnical annotations that teachers and other nonresearchers will actually enjoy reading Each study is briefly described and then commented on from a researcher s perspective a teacher s perspective and finally a shared perspective The 30 reports address important practical issues recognizable to anyone familiar with what happens in a physical education class The book shows how the studies can be useful to teachers in their own work and it points out how valuable information from research can be used to improve teaching The book also demonstrates how stimulating and fruitful dialogue can be when the knowledge of researchers and practitioners is brought together around a single study By discussing each study from both perspectives the book sheds light on the common ground between researchers and physical educators and fosters mutual respect between the two The varied perspectives can also provide a valuable springboard for thought provoking discussions among colleagues in a school setting or in a graduate level physical education course The book presents 12 guidelines that will help readers navigate through the difficult aspects of the typical research report plus four annotated bibliographies to help readers explore topics that are more specific and more advanced No other resource makes such a diverse group of studies so accessible If educators are to put research to work in their own teaching methods and program designs there s no better place to start than with these straightforward conversations in the gym      *Play and Learning in the Early Years* Pat Broadhead, Justine Howard, Elizabeth Wood, 2010-03-25 By helping the

It shows how pedagogy not only underpins the early years curriculum but is also inherent in the role of the adult and the experiences that are offered to young children. The book explains what the differing early years pedagogies are, why they are encouraged, and the knowledge, skills, and practice that are required to work with them. Emphasising that what works in one situation may not in another, and a wider pedagogical knowledge is essential to ensure quality outcomes for children, it considers key topics such as the role of the pedagogue and developing your own style, promoting a lifelong love of learning in children under your care, sensitivity and inclusion for all children's cultures and communities, promoting the rights of every child under your care. Incorporating reflection points and research tasks to support independent learning, this is essential reading for students on Early Childhood Studies courses and Early Years Foundation Degrees, as well as early years practitioners.

**Teacher Strategies in an Early Childhood Education Play Setting** Jane Putnam Perry, 1989      **Play at the Center of the Curriculum** Judith Lieberman Van Hoorn, 1999 This resource examines the natural connection between play and a young child's development and learning. The authors advocate that play should be at the heart of the early childhood curriculum and then demonstrate how to draw both the methods and the content of a successful curriculum from children's spontaneous play. Anecdotes of children's play, theories of play and development, and instructional strategies are interwoven throughout the book. This book takes a unique position, asking not only, "How can play support curriculum?" but also, "How can curriculum support play?"

**Let Them Play** Denita Dinger, Jeff A. Johnson, 2013-01-15 Playtime is focused, purposeful, and full of learning. As they play, children master motor development, learn language and social skills, think creatively, and make cognitive leaps. This curriculum is all about fostering children's play, trusting children as capable and engaged learners, and leaving behind boxed curriculums and prescribed activities. Filled with information on the guiding principles that make up an uncurriculum learning experience, ideas, and suggestions for building strong emotional and engaging physical environments, *Let Them Play* provides support to those who believe in the learning power of play. Jeff A. Johnson spent twenty-five years as a child care provider in center and home-based programs. He now works full-time as an author, keynote speaker, podcaster, toymaker, and early learning advocate. He is the author or coauthor of six other Redleaf Press books. Denita Dinger has been a child care provider for more than fifteen years and operates a family child care program. For the last five years, she has been a frequent keynote speaker at early childhood conferences focusing on the topics of hands-on learning and learning through play.
