Primary Perceptions Poetry And Prose Snippets:

Primary Perceptions Eva Schlein Jungermann, 2000
Hobby, Alessandro Porco, Joseph Bathanti, 2025-02-18
Perception offers a critical examination of Wordsworth's and Coleridge's naturalist construction of creative and critical perception and a historical study of the perceptual dimension of poetic taste Genial is the adjectival form of genius and eighteenth century critical naturalism understands genial perception as a gift of nature as an inborn power operating autonomously through the senses and imagination and thus independently of cultural influence By exploring the philology of keywords and binaries inherited by the two poet critics and used to describe and interpret their perceptual experience both creative imaginative and critical Genial Perception traces how that experience reveals an unacknowledged indebtedness to discourse and language having been silently and perhaps unconsciously shaped by patterns and trends in the literary culture in which Wordsworth and Coleridge came of age This study shows that critical perception often thought to be too elusive and subjective to make a proper subject for historical investigation can be approached through study of the terms the language of the practical criticism that attempts to communicate it that both critical and creative perception are far more dependent on language than is commonly recognized and that philology by recovering the original usage functions and contexts of critical keywords provides for an accurate historical understanding of the claims made by critics in the long eighteenth century for genial perception and can illuminate the dynamics of genial perception itself

Narrative and Cognition in Literature and Science Michael Sinding, Aura Heydenreich, Klaus Mecke, 2025-07-21 This volume explores cognitive perspectives on how science and narrative shape one another Narrative is a principle of cognition and cognition is fundamental to narrative This duality enables a deeper mapping of the feedback between story and the natural sciences Science as a culturally organized and systematic mode of knowing the world may seem opposed to narrative thinking Yet they are deeply interwoven Scientists tell many kinds of stories across genres and media In thought experiments lab experiments written arguments and histories and philosophies of fields they recount and interpret unfoldings of events at often uncanny scales from particle collisions to the evolution of life to cosmic expansion Science stories go beyond science Early science is entwined with myth religion and magic We still mythologize beneficent or evil geniuses the promises and perils of technology Teachers journalists politicians and lawyers all tell science stories for their own purposes Literary artists use scientific ideas and forms reimagining physical forces causality and time in storyworlds themes and figures This is the first cognition focused multi disciplinary analysis of these narrative science relations
