Electronic Services: Concepts, Methodologies, Tools and Applications Management Association, Information Resources, 2010-05-31 With the increasing reliance on digital means to transact goods that are retail and communication based e services continue to develop as key applications for business finance industry and innovation Electronic Services Concepts Methodologies Tools and Applications is an all inclusive research collection covering the latest studies on the consumption delivery and availability of e services This multi volume book contains over 100 articles making it an essential reference for the evolving e services discipline

Developing IP-Based Services Monique Morrow, Kateel Vijayananda, 2002-09-18 Offering new services is a great way for your organization to drive traffic and boost revenue and what better foundation for these services than IP This much is a given The difficulty is uniting business and technical perspectives in a cohesive development and deployment process Meeting this challenge is the focus of Developing IP Based Services The only book of its kind devoted exclusively to IP based services it provides a blueprint for all the engineers managers and analysts who must come together to build these services and bring them online Inside you will find just the right balance of business and technical coverage introduced with a lucid discussion of

the principles of service development and wrapped up with three case studies illustrating effective provisioning in today's marketplace. Read the chapters relating to your role and you'll play it more successfully. Have your team read the entire book and you'll achieve a level of collaboration and shared understanding that will quickly accrue to the bottom line. Valuable insight from authors with extensive service provisioning and product development experience. Written for business and technical readers at a wide range of companies including established telecoms, ISPs, ASPs, CLECs, bandwidth brokers, and vendors. Probes the business issues that will make or break your effort including shortening the development cycle and choosing a competitive model. Provides the technical coverage required for successful implementation according to the terms of the business model you choose. Focuses on the IP technologies that offer your service and its users the greatest value including MPLS, Voice Over IP, and multicast. Helps you meet tough challenges relating to security and Quality of Service. Concludes with case studies illustrating successful service development and deployment in three companies.
