**Services Trade in the Balkans** Constantine Michalopoulos,Vasileios Panousopoulos,2013      **Services Trade in the Balkans** Constantine Michalopoulos,Vasileios Panousopoulos,2002 This study aims at providing an overview of policies affecting services trade in seven countries of the Balkan region and stresses the growing importance of services trade The service sectors particularly tourism and transport play an important role in the economies of the Balkan countries The paper finds that on average the countries involved are committed to a liberal trade regime for services and that they have made more commitments to liberalize services in the World Trade Organization WTO than developing countries at comparable levels of development For the future the paper encourages further liberalization at the regional level on a Most Favoured Nation MFN basis as well as policy harmonization with the European Union      **Western Balkan Economies in Transition** Reiner Osbild,Will Bartlett,2018-08-23 This book explores the economic and social development of the Western Balkan region a group of six countries that are potential candidates for EU membership It focuses on the key economic issues facing these countries including the challenge of promoting economic growth limiting public deficits and debt and fostering international trade relations Given the severe impact of the recent economic crisis on social welfare in the region it also investigates the nature and extent of social exclusion a factor likely to produce future political instabilities if not effectively addressed by a return to sustainable economic growth The contributions explore these issues in light of the major influence of EU policy instruments and advice which are currently guiding the economies along an accession trajectory to future EU membership

**Golden Growth** Indermit S. Gill,Martin Raiser,2012-04-25 The public debt crisis in Europe has shaken the confidence not just in the Euro but in the European model Aging and uneconomical Europeans are being squeezed between innovative Americans and efficient Asians it is said With debt and demographics dragging them down one hears that European economies will not grow much unless radically new ways are discovered The end of complacency in Europe is a good thing but this loss of confidence could be dangerous The danger is that in a rush to rejuvenate growth the attractive attributes of the European development model could be abandoned along with the weak In fact the European growth model has many strong points and enviable accomplishments One can say without exaggeration that Europe had invented a convergence machine taking in poor countries and helping them become high income economies World Bank research has identified 27 countries that have grown from middle income to high income since 1987 a few thanks to the discovery and exploitation of massive natural resources e g oil in Oman and Trinidad and Tobago several others like Japan Hong Kong Singapore Taiwan and South Korea embracing aggressive export led strategies which involved working and saving a lot postponing political liberties and looking out only for themselves But half of the countries that have grown from middle income to high income Croatia Cyprus Czech Republic Estonia Greece Hungary Latvia Malta Poland Portugal Slovak Republic and Slovenia are actually in Europe This is why the European model was so attractive and unique and why with some well designed efforts it

ought to be made right again      **Competitiveness and Private Sector Development Western Balkans**

**Competitiveness Outlook 2024: Albania** OECD,2024-06-26 Inclusive and sustainable economic growth in the six Western Balkan WB6 economies depends on greater economic competitiveness Although the gap is closing gradually the standards of living in WB6 are well below those of the OECD and EU Accelerating the rate of socio economic convergence will require a holistic and growth oriented approach to policy making This is the fourth study of the region formerly under the title Competitiveness in South East Europe and it comprehensively assesses policy reforms in the WB6 economies across 15 policy areas key to strengthening their competitiveness It enables WB6 economies to compare economic performance against regional peers as well as EU OECD good practices and standards and to design future policies based on rich evidence and actionable policy recommendations The regional profile presents assessment findings across five policy clusters crucial to accelerating socio economic convergence of the WB6 by fostering regional co operation business environment skills infrastructure and connectivity digital transformation and greening Economy specific profiles complement the regional assessment offering each WB6 economy an in depth analysis of their policies supporting competitiveness They also track the implementation of the previous 2021 study s recommendations and provide additional ones tailored to the economies evolving challenges These recommendations aim to inform structural economic reforms and facilitate the region s socio economic convergence towards the standards of the EU and OECD      **Lifting Growth in the Western Balkans**

Mr.Nadeem Ilahi,Mrs.Armine Khachatryan,William Lindquist,Ms.Nhu Nguyen,Ms.Faezeh Raei,Jesmin Rahman,2019-11-12 In the past 25 years exports have contributed strongly to growth and economic convergence in many small open economies However the Western Balkan WB region consisting of small emerging market economies has not fully availed itself of this driver of growth and convergence A lack of openness reliance on low value products and weak competitiveness largely explain the insignificant role of trade and exports in the region s economic performance This paper focuses on how the countries in the WB could lift exports through stronger integration with global value chains GVCs and broadening of services exports The experience of countries that joined the European Union in or after 2004 shows that participation in GVCs can help small economies accelerate export and income growth WB countries are not well integrated into Europe s vibrant GVCs Trade within the region is also limited it tends to be bilateral and not cluster like Our analysis shows that by improving infrastructure and labor skills and adopting trade policies that ensure investor protection and harmonize regulations and legal provisions the region can greatly enhance its engagement with GVCs Services exports are an increasingly important part of global trade and they offer an untapped source of growth The magnitude of services exports from the WB region compares favorably with that of peers in Europe particularly in travel services where several of these countries have a revealed comparative advantage But there is significant room for growth in tourism exports and an untapped potential in business and information technology services exports that these countries can materialize through policy efforts that

increase openness and enhance connectivity and labor skills Serbia offers a good example of how decisive efforts including education policies to ensure a sustained supply of skilled labor can help information technology services exports to take off

Western Balkan Integration and the EU Sanjay Kathuria,2008 This title explores ways for the Western Balkan countries to improve growth prospects through deepening of regional integration and improving selected elements of their investment climate It analyzes areas relating to trade in goods and services regional integration and selected aspects of the investment climate It suggests that countries in the region could reap sustained growth payoffs by focusing on deepening regional integration improving human capital reducing telecommunication costs and pre empting energy shortages Information Service ,1928 Regional Cooperation in the Western Balkans Milica Delević-Đilas,2007 This Chaillot Paper tries to provide a background against which both cooperation among the countries of the region and their integration in the EU as major vectors of long term stabilisation can be better understood but also more effectively encouraged Focusing on the forms of cooperation that exist in the region and also on the different expectations among external actors encouraging and regional actors participating in this it highlights the importance of successful future cooperation and integration in a region that has traditionally known little of either **Balkan Forum** ,1996 **Information Service** Foreign Policy Association,1927
