The Old English Elegies Anne L. Klinck,2001 Bringing together some of the most important poetic texts of the Anglo Saxon period Anne Klinck presents the poems both as discrete entities and as members of an elegiac group all inspired by the sense of separation from one's desire that is at the heart *Altenglische Terminologie für Schiffe und Schiffsteile* Katrin Thier,2002 Thier's dissertation examines Old English terminology for ships and parts of ships in order to throw light on seafaring and shipbuilding during the early medieval period Initially the study draws on iconographic archaeological documentary and literary sources to discuss the types of vessel that were in use **The Battles of Maldon and**

Woman's Song Anne L. Klinck,Ann Marie Rasmussen,2002 The number of surviving medieval secular poems attributed to

named female authors is small some of the best known being those of the *trobairitz* the female troubadours of southern France However there is a large body of poetry that constructs a particular textual femininity through the use of the female voice Some of these poems are by men and a few by women including the *trobairitz* many are anonymous and often the gender of the poet is unresolvable A woman's song in this sense can be defined as a female voice poem on the subject of love typically characterized by simple language sexual candor and apparent artlessness The chapters in *Medieval Woman's Song* bring together scholars in a range of disciplines to examine how both men and women contributed to this art form Without eschewing consideration of authorship the collection deliberately overturns the long standing scholarly practice of treating as separate and distinct entities female voice lyrics composed by men and those composed by women What is at stake here is less the voice of women themselves than its cultural and generic construction
