Pickover, 2004-01-18 Provides a history of magic squares and similar structures describing their construction and classification along with information on newly discovered objects **The Seven Magic Orders** Ruth Tabrah, 1973 **The Sufi Orders in Islam** J. Spencer Trimingham, 1998-07-16 Sufism the name given to Islamic mysticism has been the subject of many studies but the orders through which the organizational aspect of the Sufi spirit was expressed has been neglected The Sufi Orders in Islam is one of the earliest modern examinations of the historical development of Sufism and is considered a classic work in numerous sources of Islamic studies today Here author J Spencer Trimingham offers a clear and detailed account of the formation and development of the Sufi schools and orders tariqahs from the second century of Islam until modern times Trimingham focuses on the practical disciplines behind the mystical aspects of Sufism which initially attracted a Western audience He shows how Sufism developed and changed traces its relationship to the unfolding and spread of mystical ideas and describes in sharp detail its rituals and ceremonial practices Finally he assesses the influence of these Sufi orders upon Islamic society in general John O Voll has added a new introduction to this classic text and provides readers with an updated list of further reading The Sufi Orders in Islam will appeal not only to those already familiar with Trimingham's groundbreaking research but also to the growing reading public of Islamic studies and mysticism *Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office, 1976 The Mathematical Scientist, 1998 **Medieval Textual Cultures** Faith Wallis, Robert Wisnovsky, 2016-08-22 Understanding how medieval textual cultures engaged with the heritage of antiquity transmission and translation depends on recognizing that reception is a creative cultural act transformation These essays focus on the people societies and institutions who were doing the transmitting translating and transforming the agents The subject matter ranges from medicine to astronomy literature to magic while the cultural context

encompasses Islamic and Jewish societies as well as Byzantium and the Latin West What unites these studies is their attention to the methodological and conceptual challenges of thinking about agency Not every agent acted with an agenda and agenda were sometimes driven by immediate needs or religious considerations that while compelling to the actors are more opaque to us What does it mean to say that a text becomes available for transmission or translation And why do some texts once transmitted fail to thrive in their new milieu This collection thus points toward a more sophisticated ecology of transmission where not only individuals and teams of individuals but also social spaces and local cultures act as the agents of cultural creativity
