McAnany, 2012-04-15 This far reaching and long overdue chronicle of communication for development from a leading scholar in the field presents in depth policy analyses to outline a vision for how communication technologies can impact social change and improve human lives Drawing on the pioneering works of Daniel Lerner Everett Rogers and Wilbur Schramm as well as his own personal experiences in the field Emile G McAnany builds a new historically cognizant paradigm for the future that supplements technology with social entrepreneurship McAnany

The Latin Americans Carlos Rangel, 2017-09-04 This is a provocative work that runs counter to the conventional wisdom that the poor are poor because the rich are rich Rangel argues that the reasons for different levels of economic development between North America and Latin America lie in the two continents divergent history of colonization the differences between their dominating social structures and the contrary ethical precepts of Catholicism and Protestantism Last but by no means least there are two all pervasive myths in the past that of the noble savage in the present that of the good revolutionary

Do the Poor Count? Michelle M. Taylor-Robinson, 2015-11-05 Latin America's flirtation with neoliberal economic restructuring in the 1980s and 1990s the so called Washington Consensus strategy had the effect of increasing income inequality throughout the region The aim of this economic policy was in part to create the conditions for stable democracy by ensuring efficient economic use of resources both human and capital but the widening gap between rich and poor threatened to undermine political stability At the heart of the dilemma faced by these new democracies is the question of accountability Are all citizens equally capable of holding the government accountable if it does not represent their interests In this book Michelle Taylor Robinson investigates both the formal institutions of democracy such as electoral rules and the design of the legislative and executive branches and informal institutions such as the nomination procedures of political parties and patron client relationships to see what incentives legislators have to pay attention to the needs of poor people and thereby adequately represent their interests
