Several Complex Variables In China:

    Several Complex Variables in China Chung-Chun Yang,Sheng Gong,1993 Today there is increasing interest in complex geometry geometric function theory and integral representation theory of several complex variables The present collection of survey and research articles comprises a current overview of research in several complex variables in China Among the topics covered are singular integrals function spaces differential operators and factorization of meromorphic functions in several complex variables via analytic or geometric methods Some results are reported in English for the first time   Several Complex Variables Joseph John Kohn,Qikeng Lu,Reinhold Remmert,Yum-Tong Siu,1984 These papers originally presented at the first international conference in several complex variables held in China cover complex differential geometry integral representation boundary behavior of holomorphic functions invariant metrics holomorphic vector bundles and pseudoconvexity Publisher   Fifth International Congress of Chinese Mathematicians Lizhen Ji,2012 This two part volume represents the proceedings of the Fifth International Congress of Chinese Mathematicians held at Tsinghua University Beijing in December 2010 The Congress brought together eminent Chinese and overseas mathematicians to discuss the latest developments in pure and applied mathematics Included are 60 papers based on lectures given at the conference   Contemporary Geometry Hung-Hsi Wu,2013-06-29 Early one morning in April of 1987 the Chinese mathematician J Q Zhong died unexpectedly of a heart attack in New York He was then near the end of a one year visit in the United States When news of his death reached his Chinese American friends it was immediately decided by one and all that something should be done to preserve his memory The present volume is an outgrowth of this sentiment His friends in China have also established a Zhong Jia Qing Memorial Fund which has since twice awarded the Zhong Jia Qing prizes for Chinese mathematics graduate students It is hoped that at least part of the reasons for the esteem and affection in which he was held by all who knew him would come through in the succeeding pages of this volume The three survey chapters by Li and Treibergs Lu and Siu Chapters 1 3 all center around the areas of mathematics in which Zhong made noteworthy contributions In addition to putting Zhong s mathematical contributions in perspective these articles should be useful also to a large segment of the mathematical community together they give a coherent picture of a sizable portion of contemporary geometry The survey of Lu differs from the other two in that it gives a firsthand account of the work done in the People s Republic of China in several complex variables in the last four decades   30 Years' Review Of China's Science And Technology (1949-1979) ,1982-01-01 This is the 1st China s Science Yearbook published since 1949 It covers events activities and progresses in various fields of science and technology from 1949 to 1979 Published in conjunction with Shanghai Scientific Publishing Co it was compiled and edited by a research team from Nature Magazine Shanghai People s Republic of China   **Science Progress in China** Lu Yongxiang,2006-04-07 Today China is in a critical period of development facing a series of challenges such as optimizing the economic structure rationalizing the use of resources protecting the ecological

environment eradicating poverty and fostering coordinated development of the whole society These challenges can not be comprehensively address without the integrated development of science and technology This book takes an active part in international cooperation for promoting the development of science and technology and the progress of human civilization In Science Progress in China Chinese scientists have outlined the development and accomplishments across a spectrum of science over the past 50 years Scientific acheivements discussed include the first synthesis of crystalline bovine insulin the publication of the diagram of rice genes and much more Promotes the development of science and education with emphasis placed on cultivating and nurting scientific talents Discusses Chinese mathematics engineering achievements and the science and technology strategies and policies Povides insights in the progress of crop genetics and breeding Offers an analysis of the development of the population and the effects of reproductive medicine *Mathematical Reviews* ,2004 <u>Several Complex Variables</u> KOHN,LU,REMMERT,SIU,2012-12-06 In recent years there has been increasing interaction among various branches of mathematics This is especially evident in the theory of several complex variables where fruitful interplays of the methods of algebraic geometry differential geometry and partial differential equations have led to unexpected insights and new directions of research In China there has been a long tradition of study in complex analysis differential geometry and differential equations as interrelated subjects due to the influence of Professors S S Chern and L K Hua After a long period of isolation in recent years there is a resurgence of scientific activity and a resumption of scientific exchange with other countries The Hangzhou conference is the first international conference in several complex variables held in China It offered a good opportunity for mathematicians from China U S Germany Japan Canada and France to meet and to discuss their work The papers presented in the conference encompass all major aspects of several complex variables in particular in such areas as complex differential geometry integral representation boundary behavior of holomorphic functions invariant metrics holomorphic vector bundles and pseudoconvexity Most of the participants wrote up their talks for these proceedings Some of the papers are surveys and the others present original results This volume constitutes an overview of the current trends of research in several complex variables **Bibliography of Mathematics Published in Communist China During the Period 1949-1960** ,1961 **Chinese Journal of Contemporary Mathematics** ,2007 **Notices of the American Mathematical Society** American Mathematical Society,1994 *Chinese Mathematics* ,1968 *Several Complex Variables* Kohn,Hermann Remmert,2012-01-21 *Selected Papers* Luogeng Hua,1983 From the Preface by H Halberstam The unexpected arrival of Loo Keng Hua in Europe in the fall of 1978 was for many of us a romantic event a legend come to life What had long been and had seemed destined to remain merely a revered name in the mathematical annals of our times assumed suddenly the handsome presence of the man himself dignified yet jovial youthful yet wise serene yet ever questing for new achievements and we realized how very much we had missed by his thirty years absence from the international scene While the publication of theses Selecta from his writings needs no justification beyond

what is in them it will I hope serve also as a way of saying a most cordial welcome back It has been an honor for me to play a small role in producing the Selecta To select only parts from the imposing whole is automatically to be wrong and it may well seem in the long run to quote loosely from a poem of Hua himself that I have repaid gifts in jade with artifacts of wood
