Rig Seismic Research Cruises 10 11 Geology Of The Central Great Australian Bight Region Report 286:

Rig Seismic Research Cruises 10 & 11 J. B. Willcox, H. M. J. Stagg, H. L. Davies, 1988 **Geological Sampling in the Great Australian Bight** D. A. Feary, 1993 *Seismic Facies and Sedimentary Processes of Submarine Fans and Turbidite Systems* Paul Weimer, Martin H. Link, 2013-11-11

The Frontiers in Sedimentary Geology series was established for the student the researcher and the applied scientist to enhance their potential to stay abreast of the most recent ideas and developments and to become familiar with certain topics in the field of sedimentary geology This series deals with subjects that are in the forefront of both scientific and economic interests The treatment of a subject in an individual volume therefore should be a combination of topical regional and interdisciplinary approaches The interdisciplinary aspects are becoming more and more important because most studies dealing with the natural sciences cannot effectively stand alone Although this thrust may sound simple in reality it is not basically because each discipline has developed its own jargon and definitions oftentimes Communication among disciplines is a major issue and can be accomplished more constructively when people with different backgrounds join together at the same symposium and can read from the same volume rather than confining themselves within the world of their own specialty meetings and journals Books in this series provide this connective link between disciplines Each book in this series provides a continuous and connected flow of concepts throughout the volume by the use of introductory chapters that outline a topic to help the reader grasp its problems and to understand the contributions that follow Geological Framework of the Central Great Australian Bight and Adjacent Areas J. Sayers, 2003
