## **Right To Strike:**

The Right to Strike in International Law Jeffrey Vogt, Janice Bellace, Lance Compa, K D Ewing, John Hendy QC, Klaus Lörcher, Tonia Novitz, 2020-03-19 This monograph was originally developed as a direct response to the claim made by members of the Employers Group at the 2012 International Labour Conference namely that the right to strike is not protected in international law and in particular by ILO Convention 87 on the right to freedom of association The group's apparent aim was to sow sufficient doubt as to the existence of an internationally protected right so that governments might seek to limit or prohibit the right to strike at the national level while still claiming compliance with their international obligations In consequence some governments have seized on the employers arguments to justify new limitations on that right The Right to Strike in International Law not merely refutes this claim but is the only complete and exhaustive analysis on this subject Based on deep legal research it finds that there is simply no credible basis for the claim that the right to strike does not enjoy the protection of international law indeed the authors demonstrate that it has attained the status of customary international law *ILO Principles Concerning the Right to Strike* Bernard Gernigon, Alberto Otero, Horacio Guido, 2000 Examines the principles laid down by the ILO's Committee on Freedom of Association concerning the right to strike covering inter alia political strikes compensatory guarantees if the right to strike is denied and protection against reprisals for strike action **The Right to Strike** Otto Kahn-Freund, 1974 Restrictions on the Right to Strike Bernd Waas, 2025-10-30 Bulletin of Comparative Labour Relations 120 Few issues in the field of labour and employment law are more controversial than the right to strike Although the limits of the right are often the subject of heated debate one thing is clear the right to strike is not without limits This anthology offers a comprehensive overview of restrictions on the right to strike at international and national levels and provides an insight into the different approaches in the legal systems The contributors of the volume are all experts in the field of labour law who are intimately familiar with the subject matter This volume examines the law of the International Labour Organization the European Convention on Human Rights and the European Social Charter within the framework of the Council of Europe and various national legal systems in Europe Particular attention is paid to the question of the right to strike in the important area of essential services As the right to strike and its limits are generally of great interest at international and national levels and as legal developments in this area have recently accelerated in many places this highly topical book is recommended not only to labour law scholars but also to political decision makers representatives of the social partners and practitioners **Regulating Strikes in Essential Services** Moti (Mordehai) Mironi, Monika Schlachter, 2018-11-09 Designing a fair effective and acceptable regime that will reconcile public interest and the public's need for an uninterrupted flow of essential services on the one hand while maintaining the freedom of collective bargaining on the other is an ever more difficult public policy challenge This book the first detailed comparative analysis of existing legal and practical approaches across a spectrum of key national jurisdictions provides a structured and

insightful overview of the law and practice of regulating strikes in essential services As such it can be of great value for public policy debate and the enhancement of national law in the field The editors have assembled experts from fourteen countries who describe and analyse their respective country s experience with strikes in essential services and the legislative and judicial as well as informal approaches towards regulating and intervening in such strikes Departing from legal theory with systematic comparative law in action research the contributors offer innumerable valuable insights into a broad array of issues and topics as the following mechanisms aiming at compensating employees for encroaching on their collective bargaining rights public accountability and responsible management of public finance role of international conventions effects of globalization and advances in technology privatization outsourcing and the decline of unions and workers solidarity growing popular intolerance towards strikes in essential services effect of human rights related court decisions convergence and divergence among contemporary legal regimes in defining and approaching strikes in essential services dispute process design and dispute resolution processes mediation conciliation and arbitration and substantive and procedural restrictions on the right to organize bargain collectively and strike The country reports are preceded by a detailed analysis of the inherent normative policy dilemma and a conceptual framework for designing and evaluating models of regulation The concluding chapter presents a comparative overview of the insights gained With its comparative perspective on one of the most sensitive areas of industrial relations and labour law and its contextually relevant options for strategic choice and public policy debate this incomparable volume will be welcomed by labour lawyers legislators policy makers judicial bodies and researchers in the field of collective labour relations and fundamental human rights of workers on the national as well as international level

**The Right to Strike in a Free Society** Leonard Francis Neal, Sir Leonard Neal, Lionel Bloch, 1983      **The Right to Strike under the European Court of Human Rights** Charalampos Stylogiannis, 2017-01-09 Master s Thesis from the year 2016 in the subject Politics Topic Public International Law and Human Rights grade 70% University College London course LLM language English abstract This paper seeks to examine from a human rights perspective the degree of protection of the right to strike under Article 11 ECHR Chapter One examines whether Article 11 ECHR offers any possibility for reading into its provisions a general right to strike It will scrutinise the initial reluctance of the ECtHR to proceed to such an interpretation and thus to adequately safeguard the right at issue Chapter Two discusses the course through which the initial despair preceded the subsequent hope of the Demir and Baykara judgement while considering the case s impacts on the protection of the right to strike Chapter Three critically examines the decision in the RMT v UK case in which the ECtHR appeared to misplace any optimism its previous jurisprudence had generated It will focus on the UK s problematic pre industrial notices which are necessary for the workers in escaping tortious liability and on the classification by the Court of a secondary action as an accessory rather than a core aspect of trade unions activity Chapter Four at first refers to the importance of the right to strike as a human right It is argued that its enhanced protection can result in the promotion of

human rights for both those taking part in the industrial action and those who are not formally engaged in the dispute Finally it discusses why the ECHR constitutes the safest route through which individuals and trade unions can challenge breaches vis a vis the right to strike
