Right And Left Essays On Dual Symbolic Classification:

Right & Left Rodney Needham, 1978 *Right and Left* is the first book to explore symbolic dualism systematically in a variety of cultures Featuring a new translation of Robert Hertz's seminal work *The Pre-eminence of the Right Hand* this rewarding collection presents seventeen essays written between 1909 and 1971 by notable scholars on both literary and ethnographic aspects of the subject Many appear here in English for the first time and several have been materially revised for this volume Together these essays reveal the amazing range of dual symbolic classifications such as right and left masculine and feminine yin and yang and support Hertz's contention that polarity is a fundamental aspect of human expression back cover

Right and Left, 1992 Thinking with Demons Stuart Clark, 1999 This is a work of fundamental importance for our understanding of the intellectual and cultural history of early modern Europe Stuart Clark offers a new interpretation of the witchcraft beliefs of European intellectuals based on their publications in the field of demonology and shows how these beliefs fitted rationally with many other views current in Europe between the fifteenth and eighteenth centuries Professor Clark is the first to explore the appeal of demonology to early modern intellectuals by looking at the books they published on the subject during this period After examining the linguistic foundations of their writings the author shows how the writers' ideas about witchcraft and about magic complemented their other intellectual commitments in particular their conceptions of nature history religion and politics The result is much more than a history of demonology It is a survey of wider intellectual and ideological purposes and underlines just how far the nature of rationality is dependent on its historical context
