Rights And Law:

International Human Rights Law Riccardo Pisillo Mazzeschi, 2021-09-29 This textbook provides a thorough and systematic overview of human rights law including the most relevant practice and case law but also dealing with theoretical issues It pursues an original approach seeking to reconcile its didactic purpose with a scientific one positing that there must be a necessary synergy between these two purposes Furthermore the author is convinced that international human rights law should not be studied as is done in virtually every textbook as a special legal regime separate and autonomous from the overall system of international law but as a regime that is fully integrated into the international legal order The book's dominant theme is the interrelationship of international human rights law and general international law Following this approach the author has chosen to devote comparatively little content to institutional issues Part IV and to instead more intensively explore the structural impact of human rights law on the entire international order Part I on the sources Part II and obligations Part III of general international law and what constitutes fundamental human rights Part V without neglecting other rights Part VI The Cambridge Companion to Human Rights Law Conor Gearty, Costas

Douzinas, 2012-11-22 Human rights are considered one of the big ideas of the early twenty first century This book presents in an authoritative and readable form the variety of platforms on which human rights law is practiced today reflecting also on the dynamic inter relationships that exist between these various levels The collection has a critical edge The chapters engage with how human rights law has developed in its various subfields what if anything has been achieved and at what cost in terms of expected or produced unexpected side effects The authors pass judgment about the consistency efficacy and success of human rights law set against the standards of the field itself or other external goals Written by world class academics this Companion will be essential reading for students and scholars of human rights law **The Accountability of Armed**

Groups under Human Rights Law Katharine Fortin, Foreword by Andrew Clapham, 2017-08-11 Today the majority of the armed conflicts around the world are fought between States and armed groups rather than between States This changed conflict landscape creates an imperative to clarify the obligations of armed groups under international law While it is generally accepted that armed groups are bound by international humanitarian law the question of whether they are also bound by human rights law is controversial This book brings significant new understanding to the question of whether and when armed groups might be bound by human rights law Its conclusions will benefit international law academics legal practitioners and political scientists and anthropologists working on issues related to rebel governance and civil wars This book addresses the debate on this topic by employing a theoretical historical and comparative analysis that spans international humanitarian law international criminal law and international human rights law Embedding these different perspectives in public international law this book brings several key points of clarification to the legal framework Firstly the book draws upon social science literature on armed conflict to present a new viewpoint on the role that human rights law

plays vis vis international humanitarian law in non international armed conflicts Secondly the book sheds light on the circumstances in which armed groups acquire obligations under human rights law It brings illumination to these topics by combining historical and comparative research on belligerency insurgency and international humanitarian law with a theoretical analysis of legal personality under international law In the final part of the book the author tests the four most utilised theories of how armed groups are bound by human rights law examining whether armed groups can be bound by virtue of i treaty law ii control of territory iii international criminal law and iv customary international law In the book s conclusions the author presents final remarks that are designed to provide concrete guidance on how the issue of armed groups and human rights law can be dealt with more thoroughly in practice

Fragmentation in International Human Rights Law Marjan Ajeovski, 2017-07-14 This book explores the effects of institutional fragmentation in international human rights law by comparing the rights jurisprudence of three human rights courts and bodies namely the European Court for Human Rights the Inter American Court for Human Rights and the Human Rights Committee Contributions cover the areas of freedom of expression journalism and the media right to privacy freedom of assembly and freedom of association political parties and measure the extent of fragmentation of human rights protection Moreover the volume argues that while the conflict of laws approach favoured by the International Law Commission might work in avoiding outright conflict in obligation in practice it is not an approach that presents a viable research agenda when it comes to understanding the causes and consequences of institutional fragmentation This is especially evident in areas like international human rights where the possibility of a silent drift between the jurisprudence of the three courts is a real possibility This book was originally published as a special issue of the Nordic Journal of Human Rights

State Responsibility for 'Modern Slavery' in Human Rights Law Marija Jovanovic, 2023-01-18 What is modern slavery and who is responsible for it What is the relevance of human rights law which primarily regulates state conduct for practices predominantly committed by private actors Where can victims seek justice and redress when national authorities fail to protect them These questions are the core focus of this book Marija Jovanovich analyses the role and responsibility of states for addressing modern slavery a diverse set of practices usually perpetrated by non state actors against the backdrop of international human rights law It explores the dynamic between criminal law and human rights law and reveals the different ways these legal domains work to secure justice for victims The book considers the absolute nature of the prohibition of modern slavery in human rights law the range of practices covered by this umbrella term and their mutual relationships the positive obligations of states established by international human rights tribunals owed to individuals subject to modern slavery and the standards for assessing state responsibility in these situations By engaging with the concept of exploitation in human rights law Jovanovich glues together diverse practices of modern slavery including servitude forced labour and human trafficking into a coherent concept The book elucidates the theoretical foundations of this fundamental human right and explains why human trafficking has an

independent place within it In addition to providing a comprehensive critique of the existing human rights jurisprudence this book offers a roadmap for the future development of law on this subject emphasizing the limits of human rights law as a tool for addressing modern slavery International Humanitarian Law and the International Red Cross and Red Crescent Movement Aldo Zammit Borda, 2013-09-13 This book provides a key reference on the role of the Commonwealth and its member states in relation to international humanitarian law IHL It provides insights in the implementation of IHL in Commonwealth states and particularly the challenges faced by small states It examines the progressive development of IHL in the Commonwealth and provides an analysis of some of the landmark decisions emerging from the Special Court for Sierra Leone The book was developed collaboratively between the Commonwealth Secretariat and the International Red Cross and Red Crescent Movement In this regard it contains insights in the work of the Secretariat with regard to implementation of IHL and an assessment of legislation enacted by Commonwealth states as well as an accession chart to IHL instruments It expounds on the work of the Movement including the role of National Societies the International Humanitarian Fact Finding Commission and the development of international disaster response law rules and regulation This book was based on a special issue of Commonwealth Law Bulletin *An Elementary Digest of the Law of Contracts* Stephen Martin Leake, 1878

Glossary of Technical Terms, Phrases, and Maxims of the Common Law Frederic Jesup Stimson, 1881 The International Responsibility of International Organisations Moritz P. Moelle, 2017-02-02 The International Responsibility of International Organisations addresses the joint responsibility of organisations for violations of international law committed during the deployment of peacekeeping operations More specifically it inquires if and under which circumstances in terms of the notion of control international organisations can be jointly responsible The author analyses the practice of international organisations the United Nations NATO the European Union the African Union and the Economic Community of West African States on an inter institutional level as well as in the field in the form of five case studies The likelihood and distribution of responsibility between international organisations engaged in peacekeeping operations is affected by the different layers of applicable primary norms Security Council mandates internal law of the organisations international humanitarian and human rights law Although external pressure may contribute to enhancing the effectiveness of holding international organisations jointly responsible any substantial measures and mechanisms can only be implemented with the participation of states and international organisations A Treatise on the Law of Receivers James Lambert High, 1876 The Law Quarterly Review, 1894 The Law Times Reports, 1875 **The Twilight of Human Rights Law** Eric A. Posner, 2014 Nearly all countries have ratified nearly all the major human rights treaties and all governments profess support for human rights yet most countries flagrantly violate the human rights of their citizens This book argues that the reason why is that there is a contradiction between the goal of enforcing human rights which requires simple rules and the realities of governance which require flexibility and discretion *Blackstone Economized: Being a Compendium of the Laws of England to the Present*
