Automata, Languages and Programming Timo Lepistö, Arto Salomaa, 1988 This volume contains the proceedings of ICALP 88 held at Tampere University of Technology Finland July 11 15 1988 ICALP 88 is the 15th International Colloquium on Automata Languages and Programming in a series of meetings sponsored by the European Association for Theoretical Computer Science EATCS It is a broadly based conference covering all aspects of theoretical computer science including topics such as computability automata formal languages analysis of algorithms computational complexity data types and data structures theory of data bases and knowledge bases semantics of programming languages program specification transformation and verification foundations of logic programming theory of logical design and layout parallel and distributed computation theory of concurrency symbolic and algebraic computation term rewriting systems cryptography and theory of robotics 9th International Conference on Automated Deduction Ewing Lusk, Ross Overbeek, 1988-05-04 This volume contains the papers presented at the Ninth International Conference on Automated Deduction CADE 9 held May 23 26 at Argonne National Laboratory Argonne Illinois The conference commemorates the twenty fifth anniversary of the discovery of the resolution principle which took place during the summer of 1963 The CADE conferences are a forum for reporting on research on all aspects of automated deduction including theorem proving logic programming unification deductive databases term rewriting ATP for non standard logics and program verification All papers submitted to the conference were refereed by at least two referees and the program committee accepted the 52 that appear here Also included in this volume are abstracts of 21 implementations of automated deduction systems **MFDBS 87** Joachim Biskup, Janos Demetrovics, Jan Paredaens, Bernhard Thalheim, 1988-04-01 This volume contains the 13 best of the 18 papers presented at the first MFDBS conference held in Dresden GDR January 19 23 1987 A short summary of the two panel discussions is also included The volume is intended to be a reflection of the current state of knowledge and a guide to further development in database theory The main topics covered are theoretical fundamentals of the relational data model dependency theory design theory null values query processing complexity theory and of its extensions graphical representations NF2 models conceptual modelling of distributed database management systems and the relationship between logic and databases **ESOP '88** Harald Ganzinger, 1988-03-09 The volume contains the 23 papers selected for presentation at the ESOP 88 Conference Nancy 1988 The theme of the ESOP conferences is the design specification and implementation of programming languages and systems Particular emphasis is placed on work in which an implemented system embodies an important concept or formal model of programming in such a way that its usefulness is demonstrated Among the five sections of the volume the one on language implementation contains the most papers Here a rather wide spectrum of aspects ranging from language implementation problems on parallel architectures and optimization of functional programs to new concepts for programming environments is covered Another large section consists of papers in the area of algebraic specification and type concepts The papers in this

section are devoted to issues such as polymorphism subtypes and notions of implementation and reuse for algebraic specifications Two further sections are devoted to new language concepts and novel approaches to program development and verification

Attribute Grammar Inversion and Source-to-source Translation Daniel M. Yellin, 1988-04-15 With the proliferation of computer languages and dialects it is important to create tools to aid in the construction of source to source translators By allowing users to make use of software or data written for another system these tools form an important component in the quest for software reusability After discussing the theoretical and practical issues of attribute grammar inversion this book demonstrates how the technique can be used to build source to source translators This is done by first identifying a common canonical form in which to represent the various source languages and then writing attribute grammars from each source to the canonical form By automatically inverting these attribute grammars one obtains translators from the canonical form back to each source language and by composing the appropriate pairs of translators one obtains source to source translators To prove the feasibility of the inversion approach to source to source translation it has been used to generate translators between the programming languages Pascal and C

Logic Programming '87 Koichi Furukawa, Hozumi Tanaka, Tetsunosuke Fujisaki, 1988-06-22 This volume contains most of the papers presented at the 6th Logic Programming Conference held in Tokyo June 22 24 1987 It is the successor of Lecture Notes in Computer Science volumes 221 and 264 The contents cover foundations programming architecture and applications Topics of particular interest are constraint logic programming and parallelism The effort to apply logic programming to large scale realistic problems is another important subject of these proceedings

Uncertainty and Intelligent Systems Bernadette Bouchon, Bernadette Bouchon-Meunier, Lorenza Saitta, Ronald R. Yager, 1988-06-08 This book contains the papers presented at the 2nd IPMU Conference held in Urbino Italy on July 4 7 1988 The theme of the conference Management of Uncertainty and Approximate Reasoning is at the heart of many knowledge based systems and a number of approaches have been developed for representing these types of information The proceedings of the conference provide on one hand the opportunity for researchers to have a comprehensive view of recent results and on the other bring to the attention of a broader community the potential impact of developments in this area for future generation knowledge based systems The main topics are the following frameworks for knowledge based systems representation scheme neural networks parallel reasoning schemes reasoning techniques under uncertainty non monotonic and default reasoning evidence theory fuzzy sets possibility theory Bayesian inference approximate reasoning information theoretical approaches knowledge acquisition and automated learning

SWAT '88 Rolf Karlsson, 1988-06-22 The papers in this volume were presented at the 1st Scandinavian Workshop on Algorithm Theory held July 5 8 1988 in Halmstad Sweden The contributions present original research in areas related to algorithm theory including data structures computational geometry and computational complexity In addition to the selected papers the proceedings include invited papers from I Munro K Mehlhorn M Overmars

and D Wood **Experiences with Distributed Systems** Jürgen Nehmer, 1988-05-25 This book contains papers presented at the NATO Advanced Research Workshop on Real time Object and Environment Measurement and Classification held in Maratea Italy August 31 September 3 1987 This workshop was organized within the activities of the NATO Special Programme on Sensory Systems for Robotic Control Four major themes were discussed at this workshop Real time Requirements Feature Measurement Object Representation and Recognition and Architecture for Measurement and Classification A total of twenty five technical presentations contained in this book cover a wide spectrum of topics including hardware implementation of specific vision algorithms a complete vision system for object tracking and inspection using three cameras trinocular stereo for feature measurement neural network for object recognition integration of CAD Computer Aided Design and vision systems and the use of pyramid architectures for solving various computer vision problems These papers are written by some of the very well known researchers in the computer vision and pattern recognition community and represent both industrial and academic viewpoints The authors come from thirteen different countries from Europe and North America Therefore readers will get a first hand and current information about the status of computer vision research in various western countries Further this book will also be useful in understanding the current research issues in computer vision and the difficulties in designing real time vision systems **Distributed Algorithms** Jan Leeuwen, 1988
