M. Chambers, 2012-12-06 I am pleased to present this volume of invited reviews and research case studies produced to mark the retirement of Professor A G Smith one of the leading researchers in Holocene palaeoecology A G Smith took his first degree at the University of Sheffield graduating in 1951 with a first class honours degree in Botany His doctorate was awarded in 1956 for a study in late Quaternary vegetational history based in the Sub Department of Quaternary Research at the University of Cambridge under the supervision of the late Sir Harry Godwin FRS He then

researched and taught at Queen's University Belfast from 1954 leading the Nuffield Quaternary Research Unit there becoming Co Director of the Palaeoecology Laboratory from 1964 He was appointed Professor and Head of the Department of Botany later Plant Science at University College Cardiff in 1973 and retired from the School of Pure and Applied Biology at the renamed University of Wales College Cardiff in August 1991 Although his principal interests have been concerned with the post glacial environmental history of the British Isles Professor Smith has significantly influenced many researchers elsewhere in their interpretation of biological and other evidence for human modification of the natural environment *The Science and Politics of Global Climate Change* Andrew E. Dessler, Edward A. Parson, 2006 In this accessible primer Dessler and Parson combine their expertise in atmospheric science and public policy to help scientists policy makers and the public sort through the conflicting claims in the climate change debate The authors explain how scientific and policy debates work summarize present scientific knowledge and uncertainty about climate change and discuss the available policy options Along the way they explain WHY the debate is so confusing Anyone with an interest in how science is used in policy debates will find this discussion illuminating The book requires no specialized knowledge but is accessible to any college educated general reader who wants to make more sense of the climate change debate It can also be used as a textbook to explain the details of the climate change debate or as a resource for science students or working scientists to explain how science is used in policy debates
